

HARTPURY
UNIVERSITY

Programme Information Sheet for 2019 entry

BSc (Hons) Zoology

UCAS Code: D320A

Award on completion of programme: BSc (Hons) Zoology / BSc (Hons) Zoology with Integrated Placement Year.

Professional body accreditation: None

Location of study: Hartpury University. Any integrated placement years will be discussed with the programme manager and can be undertaken in the UK and abroad. Placements undertaken by students in the past have included the UK, Kenya, South Africa and the Seychelles.

Length of programme: Three years full-time or four years with the optional integrated placement year. Part-time options are available.

Language of the programme: This programme is taught in English.

Entry Requirements:

General: A minimum of 5 GCSE A* to C, (or 9 to 4 where numeric grades are being awarded), including English Language and Mathematics

A-levels: Typical offer is BBC or equivalent. This must include a minimum of two A Levels including one in a Biological Science and excludes General Studies.

Vocational Award: Typical offer is a DMM in an Extended Diploma or equivalent in a relevant subject

International Baccalaureate: We welcome students with the International Baccalaureate Diploma qualification. Offers will be based upon the constituent components to include a grade 3 at higher level biological science. Please contact the admissions team for more information.

Access: We welcome students with Access qualifications. Certain programmes require a pass at level 3 in specific units. Please contact the admissions team for more information.

Mature and international applicants: Mature and international applicants are welcomed. Mature applicants that are not applying for a programme straight from formal education will be expected to demonstrate suitability for the course.

In the case of international applications, we will attempt to establish the equivalency of qualifications and the same criteria and assessment is used as for home students. An IELTS English qualification is expected for international applicants without a GCSE Grade C or above (or 9 to 4 where numeric grades are being awarded) in English Language.

If you have completed learning towards a university level qualification, perhaps at another institution or with a professional body or have relevant work experience then you may be able to gain credit for this and/or enter the course at a later point than standard year one entry. For further information please contact our Admissions team, who will be pleased to help you.

Personalised offers will be made to each applicant based on their own merits. Non-academic and academic achievement will be considered.

Timetables: Both full-time and part-time students on the programme will start in September 2019. This

programme is taught over two semesters, normally consisting of 12 weeks of scheduled teaching and then assessment weeks. The academic calendar can be found at: <http://www.hartpury.ac.uk/uni-termdates/>. During scheduled teaching you will have a day without timetabled sessions to support you in managing your workload, gaining valuable volunteering and work experience and completing part-time work. For the 2018/19 academic year that day is currently a Friday. Timetables are normally available during registration. Please note that while we make every effort to ensure that timetables are as student-friendly as possible, scheduled teaching can take place at any time between 8:30 to 20:30 Monday to Friday, although Wednesday afternoons are normally reserved for sports and cultural activities. Work placements may entail working on different days and different hours, depending on the opportunity you identify. Part-time students should be advised that as their route is dependent on the full-time course's timetable there is the possibility depending on the modules chosen that the student could be required to attend four days a week.

Programme Composition: This programme is comprised of different modules, which focus on specific subjects, and provide an opportunity to develop specialisms over the duration of the course. The modular structure of the programme gives you flexibility and choice and you can attend introductory sessions for optional modules before having to finally decide which ones you wish to study. We usually offer all optional modules available to students however if we believe that we are unable to offer a high quality student experience (which can be particularly affected by low student demand) then we may make the decision not to offer it. If an optional module will not be run, we will advise you as soon as possible and help you choose an alternative module. Our teaching is informed by research, and modules change periodically to reflect developments in the discipline. These changes are informed by both industry and student consultation.

On completion and passing of these modules you gain academic credit that accumulates towards your award. The marks you gain for the modules completed after your first year may contribute towards your overall award mark and outcome. The modules contain mixture of scheduled learning, independent learning and sometimes learning whilst on work placement.

	Scheduled Contact Learning (%)	Placement Learning (%)	Independent Learning (%)
Year 1	24	0	76
Year 2	24	0	76
Optional integrated placement year	0	100	0
Year 3	18	0	82

Students will receive a minimum of 15 hours scheduled contact per week in lectures, seminars and practicals in their first year. In subsequent years scheduled contact will vary depending on the modules you select but is typically around 12 hours per week. Students are expected to dedicate at least two to three hours of independent study per contact hour. Some modules offer trips to locations such as zoos or assistance animal breeding centres to show students how their knowledge can be applied within the animal industry. Some modules may bring in guest lecturers to provide topical and industry-relevant talks.

Core Modules

Year 1

- **Systems Biology**
An introduction into the biology of animals, particularly into the different body systems and their interactions
- **Animal Genetics**
An introduction into the science of genetics and heredity
- **Animal Health & Disease**
Studying how diseases affect animals and how to apply informed decision-making
- **Animal Nutrition**
Study of nutritional principles and their relation to health and disease in animals
- **Biodiversity**
Study of natural world and wildlife
- **Animal Behaviour & Welfare**
Introduces students to the problems and insights of animal behaviour and welfare, including the

study of ethical issues and legislation

- Fundamental skills for Zoology
An introduction to the key academic and vocational skills and personal attributes to be successful in a career in the animal industry and through the study of zoology.

Year 2

- Conservation Biology
This module will introduce you to the fundamental principles of wildlife conservation, and apply knowledge learnt in year 1, including genetics, biodiversity and tackling real world problems
- Undergraduate Research Process
This module introduces students to the methods of research and analysis required for their dissertation

Optional modules: These can cover a range of animal science topics including ethics and welfare, behavioural and evolutionary ecology, animals in education, behavioural measurement, management of domestic animals and animal microbiology. The second year Field Course module offers the option of a trip to South Africa to study the local wildlife.

Optional Integrated Placement Year: An optional placement year (minimum of 40 weeks in length) allows theory to be integrated into practice. This is facilitated through long standing links with a wide range of animal-based industries, such as charities, zoos, animal rescue centres and boarding kennels amongst others.

Year 3

- Wildlife Management & Conservation Genetics
This module provides the opportunity to work with a UK zoo to explore the application of the biology learnt throughout the course to the practical zoo environment, through a residential trip. Students will also explore topics such as wildlife reintroduction and breeding for conservation.
- Undergraduate Dissertation
Students will partake in independent research and analysis in a related area with 1:1 support from an academic.

Optional modules: These can cover a range of animal science topics including advanced animal microbiology, anthrozoology and psychology.

Assessment Method: You will be assessed through a mixture of written exams, practical exams and coursework. Many of the modules will be marked based on a mixture of assessment types, whilst others will be based solely on one type of assessment.

	Written Examination (%)	Coursework (%)	Practical Examination (%)
Year 1	45	36	19
Year 2	45	24	31
Optional integrated placement year	0	100	0
Year 3	40	57	3

Discounts and special support associated with enrolling on the programme: Hartpury also subsidises optional short courses for a reduced cost that give students the opportunity to gain relevant experience and qualifications prior to graduation. These are in addition to the discounts Hartpury usually offers to its students, such as free Wi-Fi on site and Microsoft Office packages etc. There is lots of support available to you whilst you study including allocation of a personal academic tutor that you will meet for 1:1 sessions and other services detailed at <http://www.hartpury.ac.uk/university-centre/facilities/life-at-hartpury/student-support/>.

Costs associated with the programme: The cost of the programme will be £9250 per year for UK and EU students subject to government approval. We will only increase our fees in accordance with guidelines laid down by OFFA. Students are required to purchase appropriate clothing and footwear which is available from our supplier's online shop for approximately £100. The optional module in the second year, Field Course, offers a trip to South Africa that costs in the region of £1500 to study the ecology and ethology

of the area. In the third year of the course there is a residential trip to a UK zoo, as part of the Wildlife Management & Conservation Genetics module. This will incur an additional cost of around £150 should accommodation be necessary. For Part Time costs please refer to the Hartpury Fee policy For Part Time costs please refer to the Hartpury Fee policy at: <http://www.hartpury.ac.uk/about-us/governance-and-policies/governance-and-policies/>
