The modular structure of the programme gives you flexibility and choice and you can attend introductory sessions for optional modules before having to finally decide which ones you wish to study. We usually offer all optional modules available to students however if we believe that we are unable to offer a high quality student experience (which can be particularly affected by low student demand) then we may make the decision not to offer it. If an optional module will not be run, we will advise you as soon as possible and help you choose an alternative module. Our teaching is informed by research, and modules

change periodically to reflect developments in the discipline. These changes are informed by both industry and student consultation.

On completion and passing of these modules you gain academic credit that accumulates towards your award. The marks you gain for these modules may contribute towards your overall award mark and outcome. This programme offers students a mixture of classroom learning and independent research. Modules are generally based upon informal seminars facilitated by each module tutor and one-to-one tutorials allowing students to work around their other commitments. Some modules may bring in guest lecturers to provide topical and industry-relevant talks.
