

## Programme Specification

Part 1: Basic Data			
Awarding Institution	Hartpury University		
Teaching Institution	Hartpury		
Delivery Location	Hartpury		
Study abroad / Exchange / Credit recognition	None		
Department responsible for programme	Animal		
Programme Title	MSci Animal Behaviour and Welfare		
Professional Statutory or Regulatory Body Links	None		
Highest Award Title	MSci Animal Behaviour and Welfare		
Default Award Title	None		
Interim Award Titles	BSc (Hons) Animal Behaviour and Welfare BSc Animal Behaviour and Welfare DipHE Animal Behaviour and Welfare CertHE Animal Behaviour and Welfare		
Mode(s) of Study	Full time/Part time		
Codes	UCAS: D32X		JACS: D300
	UNIT-e: MSIAABWX		HESA:
Relevant QAA Subject Benchmark Statements	Agriculture, Horticulture, Forestry, Food, Nutrition and Consumer Sciences		
Last Major Approval Date	31 August 2018	Valid from	V2.0 - 1 September 2018
Amendment Approval Date	V2.1 – 13 February 2019	Amended with effect from	V2.1- 01 September 2019
Version	2.1		
Review Due By	1 September 2024		

## Part 2: Educational Aims of the Programme

The Integrated Masters programme in Animal Behaviour and Welfare aims to equip students with knowledge, practical skills and intellectual skills to challenge orthodox thinking about animal behaviour and welfare. Students will develop the confidence to formulate new ideas and evaluate current processes and practices in animal behaviour and animal welfare sciences. Students will develop a range of key skills to enable them to quantify the behaviour expressed by animals and to assess the welfare of animals during small group teaching within practical animal environments in the animal management collection, the institutions farm, the equestrian centre and within the animal; behaviour laboratory. These skills prepare students for employment in the animal sector enabling them to use their behaviour and welfare expertise to promote the health and welfare of, and propose optimal management environments for domestic and captive animal species. The educational aims of this undergraduate programme are to enable students to:

1. Access a coherent and relevant programme of study that enhances their ability to work within animal behaviour and animal welfare related industries.
2. Evaluate and discuss concepts, recognise and utilise theories and critically analyse information.
3. Apply knowledge and critical understanding of the well-established principles of animal behaviour and animal welfare sciences to create solutions to practical animal management issues meeting the needs of the animal industry and providing the foundation for a range of careers.
4. Transfer academic, vocational and interpersonal skills to different working environments making them an effective team member and prepare them for progression into management.
5. Make full use of vocational opportunities and experiences within a vocational setting and the workplace within the animal behaviour and welfare sector, and related animal, laboratory and veterinary industries.
6. Effectively communicate information, arguments and analysis in a variety of forms and deploy key techniques of the discipline effectively in their field of study and in a work context.
7. Provide students with progressive and developmental opportunities to design, construct and undertake scientific research relevant to the field of animal behaviour and welfare science.
8. Access opportunities including undertaking individually focused research projects in areas of their own interest, which enable students to become 'research ready' graduates capable of progressing onto doctoral level study or research positions within a range of animal related subject areas.
9. Develop the students' transferable skills, knowledge and capacity for critical analytical thought in a rigorous and constructive way through a range of assessment modalities; including case study analysis, practical assessments, written reports and verbal exploration;
10. Develop students' practical skills through the application of a range of professional techniques and equipment including behavioural analysis, clinical assessment of health and welfare, and husbandry techniques.

### Programme requirements for the purposes of the Higher Education Achievement Record (HEAR)

MSci Animal Behaviour and Welfare graduates will possess a detailed knowledge of animal behaviour and welfare which will enable them to design, evaluate and manage animal collections to promote animal health and welfare. Graduates will possess skills in critical enquiry and be able to utilise current processes and practices in animal behaviour and animal welfare science to provide solutions to industry based vocational challenges. They will also develop a range of key skills to enable them to quantify the behaviour expressed by animals and to assess the welfare of animals within practical animal environments. Graduates will have completed independent scientific investigations demonstrating the key subject specific, project management, data handling and analysis skills required to effectively demonstrate research competence.

### Part 3: Programme Structure

This structure diagram demonstrates the student journey from Enrolment through to Graduation for a typical **full time student**, including:

- 1 level and credit requirements
- 2 award requirements that are in addition to those described in the Hartpury Academic Regulations
- 3 module diet, including compulsory and optional modules

### Part 3: Programme Structure

	Compulsory Modules	Optional Modules	Awards
Year 1	Animal Behaviour (HANXNS-30-4) Animal Genetics (HANXNV-15-4) Animal Health and Disease (HANXKK-15-4) Introduction to Animal Welfare (HANXK9-15-4) Systems Biology (HANXK4-15-4) Biodiversity (HANXK6-15-4) Fundamental Skills for the Animal Scientist (HANV69-15-4)		<u>CertHE Animal Behaviour and Welfare</u> <u>DipHE Animal Behaviour and Welfare</u> <u>BSc Animal Behaviour and Welfare</u> <u>BSc (Hons) Animal Behaviour and Welfare</u>
Year 2	Animal Welfare Assessment (HANXSM-15-5) Ethics and Welfare (HANXSW-15-5) Undergraduate Research Process (HANXU5-15-5)	Students are normally required to select 75 credits from the optional modules listed below:  Behavioural and Evolutionary Ecology (HANXSR-30-5) Measuring Animal Behaviour (HANXSS-15-5) Companion Animal Behaviour and Training (HANXST-15-5) Field Course (HANXSY-15-5) Independent Report (HANXRX-15-5) Management of Domestic Animals (HANXT8-30-5) International Academic Study Portfolio (HANXRP-15-5) International Academic Study Project (HANXRQ-30-5) International Academic Study Extended Project (HANXRR-45-5) New Venture Creation (HSPXTX-15-5)	<u>MSci Animal Behaviour and Welfare</u>
Year 3	Applied Research Project (HANV3S-30-6) Animal Trade and Welfare (HANV37-15-6) Postgraduate Independent Study (HANVL4-15-7)	Students are normally required to select 60 credits from the optional modules listed below: Pet Behaviour Counselling (HANV3K-15-6) Animal Psychology (HANV4X-15-6) Anthrozoology (HANV38-15-6) Wildlife and Zoo Management (HANV3N-15-6) Developments in Animal Science (HANV3G-15-6) Biodiversity and Conservation (HANV39-15-6)	
Year 4	Postgraduate Independent Project (HANV5D-30-7) The Research Process (HANXKT-15-7) Advances in Animal Behaviour (HANXKL-15-7) Contemporary Issues in Animal Welfare Science (HANXKM-15-7)	Students are normally required to select 45 credits from the optional modules listed below: Reflection on practice (HANV6B-15-7) Equine Behaviour and Welfare (HEQXQW-30-7) The Human-Animal Bond (HANV6C-15-7)	

#### Part time:

The part time student journey from Entry through to Graduation is individually negotiated with the student.

## Part 4: Learning Outcomes of the Programme

The award route provides opportunities for students to develop and demonstrate knowledge and understanding, qualities, skills and other attributes in the following areas:

Learning Outcomes:		Animal Behaviour	Systems Biology	Animal Genetics	Biodiversity	Fundamental Skills for the Animal Scientist	Introduction to Animal Welfare	Animal Health and Disease	Animal Welfare Assessment	Undergraduate Research Process	Management of Domestic Animals	Behavioural and Evolutionary Ecology	Measuring Animal Behaviour	Ethics and Welfare	Companion Animal Behaviour & Training	Field Course	New Venture Creation	Independent Report	International Academic Study Portfolio	International Academic Study Project	International Academic Study Extended Project	Applied Research Project	Animal Trade and Welfare	Pet Behaviour Counselling	Wildlife and Zoo Management	Developments in Animal Science	Biodiversity and Conservation	Animal Psychology	Anthrozoology	The Research Process	Postgraduate Independent Project	Postgraduate Independent Study	Cont. Issues in Animal Welfare Science	Advances in Animal Behaviour	Reflection on Practice	The Human-Animal Bond	Equine Behaviour and Welfare
1	An understanding and a critical awareness of the problems and/or new insights into animal behaviour and animal welfare sciences.	✓					✓		✓			✓	✓	✓				✓		✓	✓	✓	✓	✓	✓		✓	✓	✓	✓				✓			✓
2	The skills and ability to collect and manage biological data, including behavioural data and parameters of animal welfare assessment.					✓	✓		✓	✓		✓	✓			✓			✓	✓	✓	✓	✓		✓												✓
3	An understanding of the ethical issues in relation to captive animal management and welfare.						✓				✓			✓	✓				✓	✓	✓		✓		✓					✓				✓			✓
4	An understanding of government policy and legislation relating to animal welfare.					✓	✓				✓			✓	✓				✓	✓	✓		✓		✓								✓				✓
5	The ability to apply the knowledge gained during the programme, together with an understanding of how established techniques of enquiry are used to create and interpret knowledge in applied science.	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓		✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓					✓				✓
1	Use problem-solving skills and decision-making strategies to support investigations in the context of animal welfare assessment.					✓	✓	✓	✓										✓	✓	✓	✓	✓	✓	✓				✓	✓	✓	✓	✓	✓			✓

Part 4: Learning Outcomes of the Programme

[illegible]

Part 4: Learning Outcomes of the Programme	
--	--

[illegible]

## Part 5: Student Learning and Student Support

### Teaching and learning strategies to enable learning outcomes to be achieved and demonstrated

There is a policy for a minimum average requirement of 15 hours in year one and 12 hours/week contact time over the course of the full undergraduate programme. This contact time encompasses a range of face: face activities as described below. In addition a range of other learning activities will be embedded within the programme which, together with the contact time, will enable learning outcomes to be achieved and demonstrated.

Specifically, students will be assigned a personal tutor to provide additional guidance and support throughout the duration of their programme. Upon registration a student will have access to an induction programme incorporating literature searching skills and a library induction, which will include exercises to develop academic study skills. Study skills support throughout the programme will also be available for students that are successfully accepted to the programme using the institutions established student support mechanisms. Support for students with varied learning requirements is available and students may apply for alternative forms of assessment and other methods of support as applicable to their individual circumstances. Support is also available for students to develop their career aspirations with events, group sessions and individual appointments with dedicated careers staff.

On the MSci Animal Behaviour and Welfare there is a mixture of teaching approaches, including:

#### ***Scheduled learning***

May include lectures, seminars, tutorials, project supervision, demonstration, practical classes and workshops; fieldwork; external visits. Scheduled sessions may vary slightly depending on the module choices made.

#### ***Independent learning***

May include hours engaged with essential reading, case study preparation, assignment preparation and completion etc. These sessions constitute an average time per level.

#### ***Virtual Learning Environment (VLE) (or equivalent)***

This specification is supported by a VLE where students will be able to find all necessary module information. Direct links to information sources will also be provided from within the VLE.

#### ***Careers***

To support learner's career preparations, careers personnel visit the institution on a regular basis and the students can use all the on line resources. Tutors will also offer subject specific careers advice through module sessions or individual tutorials. Careers Fairs are arranged periodically to allow students to engage directly with employers from the industry sector.

### Description of any Distinctive Features

The purpose of the programme is to provide an intellectually challenging, vocationally relevant platform for pursuing a career in animal behaviour and welfare or progressing to further study. The award has been designed to build on the competencies of a wide spectrum of students who should be capable of taking up appropriate positions of responsibility within the varied range of enterprises to be found operating within the animal based industries. Academic knowledge and understanding will reinforce and support the development of abilities to equip the student with the skills and knowledge relevant to their employment and to the needs of employers.

Work in the Science and Behaviour laboratories and the field (on and off-site) provides students with experience in the application of the theories learned in lectures. The programme utilises the extensive land and animal facilities present on site including the farm (which includes a 'diary unit', a flock of Romney X Cheviots sheep and a red deer herd), the animal management department (which has an extensive range of small and large mammals and vivarium species including

reptiles, amphibians and invertebrates) and the equestrian centre (incorporating access to different equine management systems and competitive environments). Guest lecturers and visits to external organisations (including Bristol Zoo, Sequani, Guide Dogs etc.) allow students to appreciate how these theories are applied in commercial organisations and real-life situations. Students are supported by staff members who have industry and research experience within animal behaviour and welfare science.

There are also two optional residential field trips available as part of the programme. A field course module to South Africa runs in the second year of the programme. This provides students with an opportunity to explore African ecology and ethology. In the third year of the course there is a residential visit to a Wildlife Park/Zoo that is part of the Wildlife and Zoo Management module. This trip enables students to identify and evaluate the environmental and behavioural needs of a range of non-domestic animal species and provides the opportunity to investigate the necessary criteria for the reintroduction of animals into the wild. Students also have the opportunity to present their research to their peers, with staff support, at various conferences including UFAW and Animal Research Seminar events.

Student study week runs once every semester providing opportunities for students to engage in a full programme of relevant short courses (such as animal first aid, animal handling, animal management, domestic animal microchipping, and lambing etc.) which often leads to either additional qualifications or the ability to gain relevant practical work experience.

The MSci Animal Behaviour and Welfare equips the student with the knowledge base and skills relevant to this broad area of applied science through the enhancement and reinforcement of academic knowledge and practical skills.

Years 1 and 2 of this programme are run in parallel to the BSc (Hons) Animal Behaviour and Welfare provision whereby compulsory modules at level 4 provide the student with a basic understanding of science and anatomical concepts. This knowledge is expanded in the subsequent modules at level 5 with a selection of optional modules enabling the student to begin specialising in areas of particular interest to them.

Years 3 and 4 are unique to this programme and are designed to offer a supportive, facilitated and structured progression from undergraduate to postgraduate study. Core modules at level 6 are focused around the development of a confident approach to the understanding, design, development and critique of research protocols and reports. In preparation for the Postgraduate Independent Project at level 7, level 6 requires the student to undertake a research project within their undergraduate dissertation to develop their investigative research skills which can then be built on/ refined or modified for their final research project. The level 7 project is supported by concurrent enrolment on the postgraduate level research process module which is designed to support students on postgraduate study from a variety of research and statistical backgrounds. Integration of this postgraduate level module offers an introduction to the postgraduate study ethos and modality which students will then be fully engaged within in the following year. Modules within year 4 are offered via block delivery which allows students to engage in employment or relevant industry work experience to complement their programme of study.

**Progression:**

Years 1 and 2 of the MSci Animal Behaviour and Welfare are run in parallel with years 1 and 2 of the BSc (Hons) Animal Behaviour and Welfare. Successful continuation and progression on to year 3 of the MSci will normally require students to complete year 2 with 240 credits contributing to the award and a minimum overall average grade of 60% at level 5. Students achieving less will usually be transferred to year 3 of the BSc (Hons) Animal Behaviour and Welfare programme, and could then apply for future postgraduate study provided they meet the entry requirements.

Overall, the programme combines the development of knowledge via teaching, research and practical skills, and facilitated progression from undergraduate to postgraduate study, to develop a graduate who can make an effective contribution to the applied science industries; both within

animal behaviour and welfare, and external fields. The balance of skills developed on the programme will enable graduates to continue with postgraduate education.

## **Part 6: Assessment**

This module will be assessed according to the Academic Regulations published for the academic year on the website <http://www.hartpury.ac.uk>

### **Assessment Strategy**

Assessment strategy to enable the learning outcomes to be achieved and demonstrated: The assessments within this programme are aimed at encouraging an 'assessment for learning' approach, in line with the institution Teaching, Learning and Scholarship strategy. These assessments should facilitate the process of reaching the learning outcomes of the modules rather than assessment being primarily a task orientated process. Assessments will be designed to encourage the concept of Education for Sustainable Development (ESD) whereby students will be required to think critically about proposed scenarios and produce methodical, evidence based enquiries within an industry based context. Further to this and in line with the institutions practices, assessments will be written to discourage plagiarism by encouraging the use of intellectual skills to synthesise information acquired following analysis and evaluation of appropriate literature. The range of assessment modalities offers a holistic assessment experience both across the levels and throughout the programme

To enable the learning outcomes to be achieved and demonstrated, knowledge is tested through a variety of methods including written assignments, poster presentations/ defence, unseen written examinations, oral examinations, case study scenarios and the development of evidence portfolios. Elements of formative assessment appear in some modules on the programme to provide additional support.

The assessment strategy for intellectual skills is intended to:

- Consolidate learning;
- Ensure appropriate and developmental feedback is provided;
- Strengthen motivation;
- Develop analytical skills;
- Encourage reflection on theoretical and practical learning;
- Facilitate academic progression.

A variety of assessment methods are utilised throughout the programme and these are monitored to ensure they relate to learning outcomes and support academic progression between levels. In year 3 HE level 6 and 7 modules are delivered with level 7 assessment being introduced in semester 2 only.

Professional skills are assessed through a range of appropriate forms of written coursework, examinations, and oral based scenarios, under controlled conditions.

Transferable skills are developed and assessed through the assessment strategy using a carefully selected range of coursework and examinations, which complement the assessment of transferable skills for example; group work, coursework which requires the use of I.T. skills, presentations, and oral examinations.

In line with the institution's commitment to facilitating equal opportunities, a student may apply for alternative means of assessment if appropriate. Each application will be considered on an individual basis taking into account learning and assessment needs. For further information regarding this please refer to the VLE.

Assessment Map											
The programme encompasses a range of <b>assessment methods</b> and these are detailed in the following assessment map:											
Assessment Map for MSci Animal Behaviour and Welfare											
		Type of Assessment*									
		Unseen Written Exam	Open Book Written Exam	In-class Written Test	Practical Exam	Practical Skills Assessment	Oral assessment and/or presentation	Written Assignment	Report / Project	Dissertation	Portfolio
Compulsory Modules Level 4	Animal Behaviour	A (26.64)		A (13.34)				B (30)	B (30)		
	Introduction to Animal Welfare	A (50)						B (50)			
	Systems Biology				A (50)				B (50)		
	Animal Genetics						A (100)				
	Biodiversity	A (50)							B (50)		
	Animal Health & Disease	A (70)							B (30)		
	Fundamental Skills for the Animal Scientist					B(100)					
Compulsory Modules Level 5	Animal Welfare Assessment	A (40)							B (60)		
	Ethics & Welfare	A (50)					B (50)				
	Undergraduate Research Process								A (100)		
Optional Modules Level 5	Companion Animal Behaviour & Training	A (40)						B (60)			
	Management of Domestic Animals					A (30)		B (70)			
	Behavioural & Evolutionary Ecology	A (30)						B (35)	B (35)		
	Measuring Animal Behaviour			A (100)							
	Field Course						A (25)		B (75)		
	Independent Report		A (25)						B (75)		
	New Venture Creation						A(100)				
	International Academic Study Portfolio										A (100)
	International Academic Study Project						A (25)				B (75)
	International Academic Study Extended Project						A (25)				B (75)
Compulsory Modules Level 6	Applied Research Project									A (100)	
	Animal Trade and Welfare	A (100)									
	Postgraduate Independent Study							A (100)			
Optional Modules Level 6	Pet Behaviour Counselling						A (50)	B (50)			
	Wildlife and Zoo Management						A (25)	B (75)			
	Developments in Animal Science	A (100)									
	Biodiversity and Conservation						A (30)	B(70)			
	Animal Psychology	A (60)							B (40)		
	Anthrozoology		A (100)								
Compulsory Level 7	The Research Process						A (30)	B (70)			
	Contemporary Issues in Animal Welfare Science				A (50)			B (50)			
	Postgraduate Independent Project								A (100)		
	Advances in Animal Behaviour	A (50)					B (50)				
	Reflection on Practice						A (30)				B (70)

Optional Level 7	The Human-Animal Bond	A (50)						B (50)				
	Equine Behaviour and Welfare						A (30)		B (70)			

\*Assessment should be shown in terms of either **Written Exams**, **Practical exams**, or **Coursework** as indicated by the colour coding above.

### Part 7: Entry Requirements

Applicants will have achieved entry criteria appropriate for the year of entry, which can be found through the institutions website ([www.hartpury.ac.uk](http://www.hartpury.ac.uk)).

We also welcome applicants from a diverse range of backgrounds who do not have the entry requirements outlined above. Applicants will be considered on the basis of evidence of personal, professional and educational experience which indicates an applicant's ability to meet the demands of the programme. Where appropriate experience or learning has been gained prior to enrolment on the programme RPL/RPEL may be possible.

Applicants whose first language is not English must also gain a minimum IELTS score of 6.0 prior to entry onto the programme.

### Part 8: Reference Points and Benchmarks

Description of **how** the following reference points and benchmarks have been used in the design of the programme:

#### **QAA UK Quality Code for HE**

Has been used to define the minimum level of achievement that students need to achieve to succeed on this programme and achieve the qualification. It has also been used to inform the academic quality of the programme and enhance the quality of the learning opportunities and the assessment methods used to measure achievement on the programme.

#### **The Standards and Guidelines for Quality Assurance in the European Higher Education Area (ESG) 2015**

The programme has been designed considering how it addresses aspects of part one of the ESG. In particular the programme has been designed so that it meets 'the objectives set for them, including the intended learning outcomes. The qualification resulting from a programme should be clearly specified and communicated, and refer to the correct level of the national qualifications framework for higher education and, consequently, to the Framework for Qualifications of the European Higher Education Area.'

Additionally the design and teaching, learning and assessment strategy within this programme encourages the programme to be 'delivered in a way that encourages students to take an active role in creating the learning process, and that the assessment of students reflects this approach'.

**The Master's Degree Characteristics (QAA 2010)** has been used to ensure that the assimilated structure of the programme conforms to the quality requirements of an Integrated Masters as outlined by the QAA and that students are supported to achieve within the challenging postgraduate component within the programme.

#### **Hartpury 2020 Strategy and the Teaching and Research Excellence Strategy 2017-2021**

These have been used in designing this programme to ensure that the programme is: learning-centred; underpinned by sound health and safety practices and informed by research and professional practice; inclusive, flexible and accessible, exemplified in particular by the part-time and accelerated study routes; and, provides a diverse assessment diet. Furthermore, the programme aims to produce graduates who: know and value themselves as open-minded, reflective and inter-dependent learners, and participants, employees, self-employed professionals and entrepreneurs in global settings and as global citizens; and, reflect on their own learning and practice, who value others as collaborators in their learning and its exchange.

## Part 8: Reference Points and Benchmarks

Assessment within the programme: is an integral part of a dynamic learning and teaching process and not separate from it; plays a key part in the rigorous setting and maintaining of academic standards; provides all students with the entitlement to parity of treatment; makes no distinction between different modes of study; ensures that progression is achieved by credit accumulation and the completion of pre-requisites and co-requisites; recognises different module learning in different forms of assessment; and, affords students the maximum opportunity to demonstrate their knowledge, skills, competencies and overall strengths through a variety of assessed activities.

### **Staff research projects:**

The proposed modules for the Animal Behaviour and Welfare programme are based on well-established teaching areas within the institution. These modules will be taught by staff who are either research active or actively engaged in scholarly activity, and who bring their current experience to bear on their teaching.

### **Employer interaction/feedback:**

The current programme was proposed as an outcome of the Animal Periodic Curriculum Review (2015). The programme design and content was informed via discussions within extensive student and employer feedback in preparation for the PCR. The programme has been refined and represented to industry and student representatives who have endorsed the proposal and report that the features included make the programme distinctive and should provide graduates with current and relevant skills and knowledge that meet the needs of the animal industry.

**What methods have been used in the development of this programme to evaluate and improve the quality and standards of learning? This could include consideration of stakeholder feedback from, for example current students, graduates and employers.**

Vocational Panel meetings include a range of interested stakeholders such as employers, former graduates and academic staff from programmes likely to feed into this programme. Current students also provide feedback on the programme at specific staff-student liaison forum meetings, within Departmental meetings and through more generic means such as module and programme surveys.

This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of individual modules can be found in module specifications, available on the Institution's website.

### Programme Approval Log

<b>Programme Title:</b>	MSci Animal Behaviour and Welfare
<b>Programme Code:</b>	D32X/MSIAABWX
<b>Initial Approval Date:</b>	01 September 2017
<b>Approved by:</b>	Hartpury Curriculum Approval Committee
<b>Approved until:</b>	01 September 2023

**Changes:**

<b>Current version number:</b> V2.0 01 September 2018	
<b>Outline Change Details:</b>  Module name change from "Behavioural Measurement" to "Measuring Animal Behaviour". Changed Assessment Map from A50 and B50 to A100 and selected In Class Test as was incorrect on version V2.0.	
<b>Material Alteration:</b> No	
<b>Rationale:</b> Proposed name change makes the module clearer in terms of content covered. Updated Assessment Map percentage as incorrect.	
<b>Module description for Course Information Sheets:</b> No changes to description, same as before. Only change is module name.	
<b>Change requested by: Sienna Taylor</b> <input type="checkbox"/> I can confirm that all programme managers have been consulted and support this change <input type="checkbox"/> I can confirm that student representatives have been consulted about this change <input type="checkbox"/> I have retained evidence of this consultation which has been placed in the Module File  <div style="text-align: center; margin-top: 20px;">  </div>	
<b>Signature:</b>	<b>Date:</b> 20/11/2018
<b>Name of Head of Department: Jane Williams</b> Yes I confirm that this change does not require additional resources beyond the scope of those already present or planned for by the department	
<b>Signature:</b> Jane Williams	<b>Date:</b> 20/11/18
<b>Approval Committee and Date:</b>	CVC 2019 02 13
<b>Change approved with effect from:</b>	1 September 2019
<b>Resulting new version number:</b>	V2.1 (2017 intake)

## Version 2.0

<b>Rationale:</b> 1. Part 1: Basic Data requires the Awarding Body to be amended from Hartpury College to Hartpury University. 2. Award Titles amended to replace (SW) with (IP). 3. Removed BUWE B80. 4. Subject Benchmark Statements updated where required	
<b>Material Alteration:</b> Yes and Course Information Sheet amended appropriately: Not required	
<b>Outline Change Details:</b> 1. Part 1: Basic Data requires the Awarding Body to be amended from Hartpury College to Hartpury University.	
<b>Change requested by:</b>	Academic Registrar
<b>CVC approval date:</b>	31 August 2018
<b>Change approved with effect from:</b>	01 September 2018
<b>New version number:</b>	2.0

## Version 1.3

<b>Outline Change Details:</b> When the programme was transferred over to the Hartpury specification the ticks for Fundamental skills were missed.	
<b>Rationale:</b> Incorrect information corrected.	
<b>Change requested by:</b>	Tamara Montrose
<b>CVC approval date:</b>	26 June 2018
<b>Change approved with effect from:</b>	01 September 2018
