

PG Cert Applied Anthrozoology

UCAS Code: D32G4

Award on completion of programme: PG Cert Applied Anthrozoology

Professional body accreditation: None

Location of study: Hartpury University

Length of programme: One year part time.

Language of the programme: This programme is taught in English.

Entry Requirements:

General: At least a lower second class (2:2) Honours Degree in a relevant subject.

Students with non-relevant qualifications but with two or more years of relevant work experience will be considered on an individual basis.

Mature and international applicants: Mature and international applicants are welcomed. Mature applicants that are not applying for a programme straight from formal education will be expected to demonstrate suitability for the course.

In the case of international applications, we will attempt to establish the equivalency of qualifications and the same criteria and assessment is used as for home students. An IELTS English qualification is expected for international applicants without a GCSE Grade C or above (or 9 to 4 where numeric grades are being awarded) in English Language.

If you have completed learning towards a university level qualification, perhaps at another institution or with a professional body or have relevant work experience then you may be able to gain credit for this. For further information please contact our Admissions team, who will be pleased to help you.

Personalised offers will be made to each applicant based on their own merits. Non-academic and academic achievement will be considered.

Timetables: This programme has been specially designed to fit around those working or volunteering within the sector. As such timetables have been carefully designed and include a lot of flexibility. Timetables are normally available during registration. It is recommended that you discuss potential timetables and how this may fit alongside working or volunteering with a member of Hartpury staff in person.

Programme Composition: This programme is comprised of different modules, which focus on specific subjects. The modular structure of the programme gives you flexibility and choice and you can attend introductory sessions for optional modules before having to finally decide which ones you wish to study. We usually offer all optional modules available to students however if we believe that we are unable to offer a high quality student experience (which can be particularly affected by low student demand) then we may make the decision not to offer it. If an optional module will not be run, we will advise you as soon as possible and help you choose an alternative module. Our teaching is informed by research, and modules change periodically to reflect developments in the discipline. These changes are informed by both industry and student consultation.

On completion and passing of these modules you gain academic credit that accumulates towards your award. The marks you gain for these modules may contribute towards your overall award mark and outcome. The modules contain mixture of scheduled learning, independent learning and sometimes learning whilst on work placement. Students are expected to dedicate at least two to three hours of independent study per contact hour. Some modules offer trips to show students how their knowledge can be applied within the animal industry. Some modules may bring in guest lecturers to provide topical and industry-relevant talks.

Compulsory Modules

- The Human-Animal Bond
 - With an introduction to ethical and philosophical principles, this module will provide underpinning concepts for more applied aspects of the programme. The module covers topics including human evolution and animal domestication, theories and principles of human psychology, and the impact of the human-animal bond on animal behaviour and welfare.

Optional modules:

These have been chosen to allow considerable flexibility for you to pursue an area that you are interested in and especially that may complement current employment and/or volunteering activity. Optional modules available are likely to include analysis of contemporary issues in animal welfare and anthrozoology, including those that might be posed by managing wildlife. In 2017 an optional module included a field course to South Africa and it is currently intended that this will be available in 2019 subject to availability.

Assessment Method: You will be assessed through a mixture of written exams, practical exams and coursework. Many of the modules will be marked based on a mixture of assessment types, whilst others will be based solely on one type of assessment.

Discounts and special support associated with enrolling on the programme: Hartpury subsidises optional short courses for a reduced cost that give students the opportunity to gain relevant experience and qualifications prior to graduation. These are in addition to the discounts Hartpury usually offers to its students, such as free Wi-Fi on site and Microsoft Office packages etc. There is lots of support available to you whilst you study including allocation of a personal academic tutor that you will meet for 1:1 sessions.

Costs associated with the programme: The cost of the programme will be £2333 per year for UK and EU students subject to government approval. International fees for this programme are £4333. Additional costs associated with the programme include an optional field trip to South Africa (approx. £1500). Hartpury alumni are entitled to a 20% discount on full-time postgraduate study fees or 10% off part-time fees.
