

Programme Specification

Part 1: Basic Data			
Awarding Institution	Hartpury University		
Teaching Institution	Hartpury		
Delivery Location	Hartpury		
Study abroad / Exchange / Credit recognition	Exchange / Credit recognition arrangement in the programme		
Department responsible for programme	Agriculture		
Programme Title	BSc (Hons) Agriculture (Livestock Production)		
Professional Statutory or Regulatory Body Links	None		
Highest Award Title	BSc (Hons) Agriculture (Livestock Production) BSc (Hons) Agriculture (Livestock Production) with Integrated Placement Year		
Default Award Title	None		
Interim Award Titles	BSc Agriculture (Livestock Production) BSc Agriculture (Livestock Production) with Integrated Placement Year Diploma of Higher Education in Agriculture Certificate of Higher Education in Agriculture Certificate in Agricultural Studies Higher Education Foundation Certificate		
Mode(s) of Study	FT / PT		
Codes	UCAS: D403		UNIT-e: BSHCAGLP
Relevant QAA Subject Benchmark Statements	Agriculture, Horticulture, Forestry, Food, Nutrition and Consumer Sciences		
Last Major Approval Date	1 September 2017 V2.0- 13 February 2018 V3.0- 1 August 2018 V4.0- 31 August 2018	Valid from	1 September 2018
Amendment Approval Date	V4.2- 13 January 2020 V4.4- 3 March 2020	Amended with effect from	V4.4 01 September 2020
Version	4.4		
Review Due By	1 September 2024		

Part 2: Educational Aims of the Programme

The target award of a BSc (Hons) Agriculture (Livestock Production) is a three-year full-time programme, with the option of completing a four-year degree with a placement year.

General Aims

This programme aims to introduce students to the diversity of livestock production within the agricultural sector at both a local, national and global level. Students will develop comprehensive knowledge and understanding of contemporary livestock production and will be able to contextualise their knowledge to evaluate management practices and propose solutions to problems commonly encountered in livestock businesses. Students will utilise the livestock enterprises on the institution's farm (beef, dairy, sheep, veal and deer) to support their development of knowledge, understanding and vocational skills and competency to enable them to work effectively both independently and as a part of a team across a range of livestock businesses. Throughout the programme, students will be consistently exposed to research and industry best practice, internationalisation in agriculture, technological advances and how emerging research is informing agricultural practice, to equip them with the skills and knowledge to be a valuable attribute to any livestock production business.

The specific aims of the programme are:

1. To equip students with a broad understanding of mixed agricultural practice and a comprehensive knowledge and understanding of multiple facets of livestock management and production systems. and uses this knowledge to study in multiple environments and from a national and global perspective
2. To articulate theory into practice to propose and defend realistic and novel solutions to emerging issues, and to promote welfare and economic success within livestock production systems.
3. To provide students with the skills to evaluate the role of the supply chain and identify novel ideas to add value within livestock production chain.
4. To expose students to new livestock technologies and their role in optimising production, improving animal welfare and meeting relevant legislation.
5. To provide students with the opportunity to think constructively and critically, and to engage in professional debate to evaluate concepts and theories of livestock production and management with industry representatives,
6. To equip students with the skills to engage in quality assurance and to be adaptable to the changing demands of consumers to ensure that livestock production meets its markets at home and for export.
7. To ensure students are aware of, and appreciate current production and welfare legislation, industry standards and methods of good practice including health and safety to minimise risk to people and improve production methods and optimise performance.
8. To develop vocational competencies and graduate attributes in livestock production and management which enhance students' employability prospects through exposure to best practice and diverse work placement opportunities both in the UK and overseas.
9. To give the students the opportunity to design, construct and undertake scientific research in the field of livestock production.
10. To encourage the effective use of reflective practice to enhance personal and professional development to develop confidence and positive self-esteem.
11. To evaluate sustainable mechanisms used within agricultural practice to promote livestock welfare and improve production
12. To expose students to global agricultural practices and different cultures, though opportunities to engage in international study and work experiences,
13. To create autonomous and determined individuals who question practice and apply the skills they have learnt to propose effective solutions to real-world livestock related problems in a professional manner.

Programme requirements for the purposes of the Higher Education Achievement Record (HEAR)
--

<p>The honours degree in Agriculture (Livestock Production) produces graduates who understand the global complexity of modern livestock production and who are capable of work within the sector in a variety of roles. Graduates have been exposed to a range of agricultural practices including placements within the livestock sector which have developed and honed their vocational skills and competencies. They have gained comprehensive knowledge and understanding of livestock production systems, animal welfare, management and business principles. They will be confident and capable of applying their subject knowledge to assist with the practical application of production methods, evaluating and applying modern technology and making management decisions to optimise production and propose effective solutions to common industry problems within the livestock sector including, procurement and processing businesses both in the UK and internationally.</p>

Part 3: Programme Structure for BSc (Hons) Agriculture (Livestock Production)

This structure diagram demonstrates the student journey from Entry through to Graduation for a typical **full time student**, including:

- 1 level and credit requirements
- 2 interim award requirements
- 3 module diet, including compulsory and optional modules

ENTRY		Compulsory Modules	Optional Modules	Awards
	Foundation Year	HANV8B-30-3 Academic Skills in Practice HAGV8V-15-3 Foundation Agricultural Studies HANV8E-30-3 Foundation Biological Principles HANV8A-30-3 Foundation Skills Development HANV8C-15-3 Reviewing Literature	Not applicable.	<u>Higher Education Foundation Certificate</u> <u>Cert Agricultural Studies</u> Requires completion of at least 60 credits at level 3 or above of which not less than 45 at level 4. <u>Cert HE Agriculture</u> Requirements: 120 credits at level 3 or above of which not less than 90 are at level 4 or above. <u>Dip HE Agriculture</u> Requirements: 240 credits at level 3 or above of which not less than 210 are at level 4 or above and not less than 90 at level 5 or above.
	Year 1	HAGV74-45-4 Skills Development for Agriculture HAGV75-30-4 Crop Production and Soil Management HAGV76-30-4 Livestock Science and Husbandry HAGV77-15-4 Sustainable Agriculture	Not applicable.	<u>BSc Agriculture (Livestock Production)</u> Requirements: 300 credits at level 3 or above of which not less than 270 are at level 4 or above, not less than 150 at level 5 or above and not less than 60 at level 6 or above.
	Year 2	HAGV78-30-5 Farm Business Management and Agricultural Policy HANXU5-15-5 Undergraduate Research Process HAGV7G-30-5 Ruminant Livestock Production HAGV7H-15-5 Pig and Poultry Production	HANXRX-15-5 Independent Report HANXRP-15-5 International Study Academic Portfolio OR HAGV7B-15-5 Professional Practice Portfolio OR HAGV7C-30-5 Professional Practice Project	<u>BSc Agriculture (Livestock Production) with Integrated Placement Year</u> Requirements: 300 credits at level 3 or above of which not less than 270 are at level 4 or above, not less than 150 at level 5 or above and not less than 60 at level 6 or above. This must include the Year Work Placement module HANVK6-15-5. <u>BSc (Hons) Agriculture (Livestock Production)</u> Credit Requirements: 360 credits at level 3 or above of which not less than 330 are at level 4 or above, not less than 210 are at level 5 or above and not less than 90 at level 6 or above. This must include all compulsory modules
	Placement Year	Placement Year: Students can undertake an optional year for work placement in agricultural or allied industries which can be completed in the UK or abroad and must be equivalent to 40 weeks' worth of work. Examples of year placements would include on farm positions, working within agricultural consultancy (livestock production), agricultural marketing, business management and food security / food safety positions. Students will complete module HANVK6-15-5 as part of their placement year.		<u>BSc (Hons) Agriculture (Livestock Production) with Integrated Placement Year</u> Credit Requirements: 360 credits at level 3 or above of which not less than 330 are at level 4 or above, not less than 210 are at level 5 or above and not less than 90 at level 6 or above. This must include all compulsory modules and the Year Work Placement module HANVK6-15-5.
	Year 3	HANV3R-45-6 Undergraduate Dissertation HAGV7D-30-6 Industry Reflection on Agricultural Practice HAGV7J-15-6 Developments in Livestock Production	HANV3M-15-6 Undergraduate Independent Study HAGV7F-15-6 Supply Chain Management HSPV54-15-6 Strategic Management	

Part time:

The part time student journey from Entry through to Graduation is individually negotiated with the student.

Part 4: Learning Outcomes of the Programme

The award route provides opportunities for students to develop and demonstrate knowledge and understanding, qualities, skills and other attributes in the following areas:

Learning Outcomes:	Skills Development for Agriculture	Crop Production and Soil Management	Livestock Science and Husbandry	Sustainable Agriculture	Farm Business Management and Undergraduate Research Process	Ruminant Livestock Production	Pig and Poultry Production	Independent Report	International Study Academic Portfolio	Professional Practice Portfolio	Professional Practice Project	Year Work Placement	Undergraduate Dissertation	Industry Reflection on Agricultural Practice	Developments in Livestock Production	Undergraduate Independent Study	Supply Chain Management	Strategic Management
A) Knowledge and understanding of:																		
1. A range of techniques, technologies and management theories used within global agriculture to support livestock production.	✓		✓	✓	✓		✓	✓		✓	✓			✓	✓		✓	✓
2. The key vocational skills and techniques required to work safely and effectively in the global livestock sector	✓		✓		✓		✓	✓				✓		✓	✓		✓	✓
3. Agricultural science and its application into practice to propose solutions to industry problems with respect to livestock husbandry, nutrition, behaviour and welfare and farm management.			✓	✓	✓	✓	✓			✓	✓	✓			✓			
4. Supply chain management, added value and marketing of livestock produce to meet a range of market needs.					✓		✓	✓		✓	✓	✓					✓	✓
5. Sustainable resource planning and management of land, capital, labour, machinery to ensure continued livestock production			✓	✓	✓		✓	✓		✓	✓			✓	✓		✓	✓
6. Agricultural policy, legislation and industry standards in relation to management of livestock, animal welfare and farm management	✓		✓		✓		✓	✓	✓			✓			✓		✓	✓
7. The moral, ethical, welfare and social issues related to livestock production.	✓		✓	✓			✓	✓						✓	✓			
8. The strategies used to reflect upon personal and business performance and set targets for future development and progression.	✓	✓	✓		✓	✓		✓	✓	✓	✓	✓		✓		✓		
9. The broad range of techniques including benchmarking and technologies utilised within modern global agriculture to monitor livestock performance and animal welfare.			✓		✓		✓	✓	✓						✓			✓
B) Intellectual Skills																		
1. Evaluate best practices and apply to problem solving within livestock production to optimise production and performance.	✓		✓	✓	✓		✓	✓						✓	✓			✓
2. Identify, analyse and discuss key production theories, concepts and principles from a range of disciplines professionally in written and oral communication.	✓	✓	✓	✓	✓			✓			✓		✓			✓	✓	
3. Use statistical means to support arguments and to investigate theories relating to business performance in the livestock sector			✓		✓		✓	✓					✓		✓		✓	✓
4. Use self-reflection to monitor their own progress in theoretical and practical agriculture, especially whilst engaged with industry partners	✓	✓	✓						✓	✓	✓	✓		✓				
5. Demonstrate the ability to apply informed decision-making in complex and unpredictable contexts in the management of livestock production systems..					✓		✓	✓							✓		✓	✓
6. Critically evaluate strategies used to increase crop and livestock production with respect to animal welfare, sustainability and policy			✓				✓	✓							✓			✓
7. Combine theoretical knowledge and practical experience to appreciate and analyse financial and other management information, and use it in decision-making to devise realistic livestock management and farm business plans.					✓		✓	✓									✓	✓

Part 4: Learning Outcomes of the Programme

C) Subject/Professional/Practical Skills																			
1.	Demonstrate the vocational and personal skills to work safely and effectively within the livestock production sectors both nationally and internationally.	✓		✓		✓		✓	✓		✓	✓	✓	✓		✓	✓		✓
2.	Engage with relevant work placement providers to develop industry experience in a range of livestock enterprises, supply chain or processing businesses either nationally or internationally.	✓		✓							✓	✓	✓			✓	✓		✓
3.	Demonstrate the academic and vocational skills developed through study and industry placements in order to progress through the degree programme.	✓	✓	✓		✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
4.	Benchmark livestock enterprise and farm performance in the context of national and international standards, and carry out comparison across businesses or within the agricultural industry sector.					✓		✓	✓			✓	✓			✓			✓
5.	Develop written and oral communication skills to disseminate information to a wide audience of peers, farmers and industry representatives.	✓				✓		✓	✓			✓	✓			✓	✓		✓
6.	Collaborate with placement providers to undertake livestock relevant research										✓	✓	✓	✓	✓	✓	✓		✓
7.	Identify, present and defend realistic proposals and solutions to relevant problems within their chosen industry placement										✓	✓				✓	✓		✓
8.	Demonstrate a commitment to continuing professional development and lifelong learning through the development of initiative, leadership and team skills in relation to self-directed and independent study, developing an adaptable and flexible approach to study and work.	✓	✓	✓		✓	✓			✓	✓			✓	✓	✓		✓	
D) Transferable skills and other attributes																			
1.	Communicate effectively through written and verbal means with the wider agricultural industry both nationally and internationally					✓		✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
2.	Prepare and present data using a range of sources and techniques for peers, enterprise managers and the global livestock industry.									✓	✓	✓	✓	✓	✓	✓	✓		
3.	Liaise with key stakeholders to promote livestock produce in an effective manner			✓		✓		✓	✓			✓	✓	✓	✓			✓	✓
4.	Utilise problem-solving skills in a variety of theoretical and practical situations.	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
5.	Take responsibility for personal and professional learning and development setting realistic targets to achieve goals and responsibilities with a positive intent.	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
6.	Manage time effectively in order to prioritise workloads during peak production within the livestock sector in order to meet targets and objectives					✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
7.	Possess the ability to work successfully both independently or as part of a team within livestock enterprises or farm management			✓	✓	✓		✓	✓			✓	✓	✓	✓		✓	✓	✓

Teaching and learning strategies to enable learning outcomes to be achieved and demonstrated

The Agriculture (Livestock Production) programme utilises a mixture of teaching approaches which aim to support the student to develop a comprehensive knowledge and understanding of the principles of livestock production. Learning opportunities are varied with students able to apply theory to practice on the institution's farm, during industry engagement, and through periods of work placement and study exchanges. The teaching and learning strategies employed within modules aims to develop graduates who can assimilate complex paradigms and propose justified solutions to problems related to agriculture.

A feature of the Foundation Year will be the facilitated workshops and individual study, enabling students to benefit from small-group study.

The Agriculture (Livestock Production) programme will have the following distinct unique selling points for each year of delivery:

Foundation Year: delivery focuses on developing a foundation in scientific and academic knowledge alongside a grounding in vocational skills.

The Foundation Year will prepare students with general study skills and opportunities to develop subject specific skills and knowledge. Additionally, the Foundation year includes an internship enabling a student to put their skills into practice and develop an early appreciation of employment opportunities and attributes necessary for enhanced employability.

Year 1: delivery is focused on providing a practical and scientific foundation in agriculture to support students' academic and interpersonal skill development alongside vocational competency.

To achieve this the first year takes an experiential approach to learning and concentrates on the development of fundamental knowledge and understanding of the agricultural industry and intellectual skills through lectures, seminars, practical and academic workshops and industry engagement. This enables students to analyse, evaluate and synthesise information and opportunities are provided for students to apply the knowledge they have gained into practice on the institution's farm, that consists of a range of mixed enterprises (dairy, sheep, beef, veal, deer), as well as through visits to external farms and industry. Students will also develop their vocational skills during their time on the institution's farm and during work experience and practical sessions. Access to a skills development bursary will also allow students to undertake and achieve industry recognised competency certificates to support their work readiness.

Year 2: delivery aims to consolidate the practical and vocational skills developed in the first year of study within industry environments. Students are encouraged to evaluate the impact and constraints of management systems and practices within livestock production,

In the second, year students continue to apply their knowledge and understanding through evidenced based learning, application into practice and exposure to best practice through a range of visits to industry and guest speakers. Optional modules allow students to tailor and build their specialist knowledge within the livestock production sector. Delivery will encourage students to develop their autonomy, engage in reflection and will reinforce the livestock competencies developed in year one. There are also opportunities for students to undertake international study or professional practice within the industry. International study will enable the students to experience a different culture and develop an international perspective of the livestock industry. This will allow them to apply different production and management techniques and strategies to propose solutions to industry problems as well as gain professional practice experience which will allow students to apply their knowledge and understanding within industry and will develop their academic and vocational skills.

Placement Year (optional): Students have the opportunity to further develop their employability and can experience different husbandry and production methods used within modern livestock production within either a regional, national or international environment.

Year 3: Delivery aims to provide students with opportunities to apply research and the skills they have developed into practice facilitating individual specialisation within their chosen career path.

The final year concentrates on the individual development of the student and their expansion of their career path within the livestock sector. Students will engage with an extended period of work placement which will refine their ability to work effectively in the livestock sector and further develop core graduate attributes to support employability. Taught content will focus on evaluation of emerging issues across the diversity of global livestock production and students will be encouraged to engage in critical review and evidence based learning, with opportunities to put this into practice provided during industry or research focused projects.

There is a policy for a minimum average requirement of 15 hours / week in the foundation year and year one and 12 hours / week contact time over the course of the full undergraduate programme. This contact time encompasses a range of face: face activities as described below. In addition, a range of other learning activities will be embedded within the programme which, together with the contact time, will enable learning outcomes to be achieved and demonstrated.

On the Agriculture (Livestock Production) programme teaching is a mix of scheduled, independent and placement learning

Scheduled learning may include: lectures, seminars, tutorials, project supervision, demonstration, practical classes with livestock; fieldwork, external visits to farms and allied industries including abattoirs, processors; work based learning on the institution's farm; supervised time in laboratories. Scheduled sessions may vary slightly depending on the module choices made.

Independent learning may include: hours engaged with essential reading, case study preparation, assignment preparation and completion, attendance at conferences and relevant industry shows / demonstrations. Scheduled sessions may vary slightly depending on the module choices made.

Placement learning may include: includes industry placements, farm duties on the institution's farm and an optional placement year in the UK or overseas.

International Academic Study

Within this programme there is an opportunity to gain academic credit for a period of studying abroad. The student would be supported to identify an opportunity of interest, which may be with established institution's partners or by individual arrangement. All periods of study abroad would have to meet the institution's requirements before enrolment on the International Academic Study opportunity modules

Description of the teaching resources provided for students

Students will have access to the onsite institution's farm consisting of a range of livestock enterprises, (dairy herd and replacements, a semi intensive beef enterprise, the veal production system, a sheep flock of ewes both indoor and outdoor lambing and a hind deer herd consisting of both native and European bloodlines). Students will be exposed to contemporary pig and poultry production through visits to specialist producers in the Midlands and the South West and processing plants dealing with these meats. The students will have access to the farm and the institution's estate for vocational skills development in the first year as well as allowing the students to apply their knowledge and understanding into practice within the various commercial enterprises, throughout all years of study. Students will have access to the livestock enterprises and the wider institution's estate in order to conduct research throughout their study alongside industry partners in production and processing businesses. During their research students will be fully supported by academic staff, laboratory staff and industry mentors.

A range of equipment is available for students to develop their vocational skills in a safe teaching environment on the farm, this includes livestock handling systems and electronic data collection which will allow students to collect data and monitor weights, growth rates and production performance and laboratories which can facilitate forage analysis (dry matter, energy and protein content) and animal health analysis (pathology, disease identification, mastitis control measures).

Lectures will occur in a specialist classroom that is situated at the farm which allows for a seamless transfer between theory and practical activities. The teaching team all have a high degree of industry relevant experience that covers all aspects of the programme and are actively engaged in research and knowledge exchange activities. An extensive list of placement providers has been built up over the past five years alongside a comprehensive network of farms and industry visits, which are used to allow students to see alternative practice and management systems.

Existing placement providers offer a range of opportunities in the UK and overseas (New Zealand, Australia, Africa, Canada). These opportunities cover the wide spectrum of livestock production systems and management) and allied industries (abattoirs, processors and consultancy). These placements will expose students to real world livestock production as well as allowing students to further develop a range of vocational skills, develop their knowledge and understanding and apply theory into practice.

Agreements with partner establishments overseas will allow students to undertake a period of academic study abroad. Partnerships with Delaware valley in the USA and Dalhousie in Canada will allow students the opportunity to study overseas for a semester in their second year and gain credit for this in the form of short course certificates as well as module completion. Existing connections overseas will assist students in finding appropriate livestock placements for both the placement year and the final year of the degree programme.

Students have access to the University Learning Centre (ULC) to support their studies. The ULC contains a wide range of text books and journals alongside ICT facilities which include agricultural specific software such as Farmplan and Gatekeeper. Within the ULC there are specific areas for individual study, group study and a higher education flexible study zone. These facilities are all available to students to support their studies.

Description of any Distinctive Features

The Agriculture (Livestock Production) programme is designed to expose students to real-world livestock production practice, with opportunities embedded at all levels to engage with industry in teaching, observing practice and during study trips in the UK and overseas. This approach will provide a balanced vocational and academic study that is intellectually challenging, vocationally relevant, and offers a foundation for pursuing a career within the livestock sector and allied agricultural industries. The programme will have the following distinctive features

- Teaching and learning strategies are designed to ensure students are given opportunities to apply theory into practice on a fully commercial mixed farm onsite that includes a range of enterprises (arable, beef, veal, sheep, dairy and deer).
- Placement opportunities with a range of regular employers and providers throughout the programme both in the UK and Overseas. These placements cover a wide range of opportunities in the livestock sector and allied industries.
- Overseas study trip and extended international academic study with partner universities in the USA and Canada. An optional overseas placement year with that will expose students to different working practices and cultures and to real world agriculture and livestock production.
- Students are able to shape and personalise their own individual learning experience and journey throughout the programme in order to match future career aspirations with the livestock sector. This will be achieved through optional module choices and placement opportunities within industry throughout the degree and particularly in the final year, supported by a training bursary of £1,000.
- Research opportunities with industry partners throughout the programme that is fully supported by academic and industry mentors / supervisors.
- Modules are timetabled to allow students to follow the livestock production cycle.
- The final year of the programme is spent predominately in industry, in a self-selected placement, during which students will be working with industry peers to engage in industry relevant practice and

research to propose novel solutions to placement specific problems. These placements can be in the UK or overseas with regular placement providers.

- Industry involvement in assessment setting and assessing alongside teaching and opportunities to put knowledge into practice.
- The opportunity to develop theoretical and vocational skills contextualised to support employment in the agricultural industry but which are transferable to allied agriculture sectors, offering graduates diverse and varied career progression
- Designed to develop and support a can do attitude in graduates, to produce autonomous and determined individuals who question practice and apply the skills they have learnt to propose effective solutions to real-world problems in a professional manner.

Part 6: Assessment

This module will be assessed according to the Academic Regulations published for the academic year on the website <http://www.hartpury.ac.uk>

The distinctive module used by the Programme Examination Board to inform recommending differential awards for students when considering borderline performance profiles will be:
Industry Reflection on Agricultural Practice

Assessment Strategy

Assessment strategy to enable the learning outcomes to be achieved and demonstrated:

Assessment throughout the programme has been designed to assess the student's ability to apply theoretical principles and current research to practice in order to resolve and provide solutions to real world issues within the field of Agriculture. This will be achieved via a wide variety of assessment methods, including a range of single assessment portfolios, traditional examinations, written reports, oral presentations, practical exams and practical skills assessment and assignments.

Portfolios have been selected because they capture within a single point of assessment a number of opportunities for the student to demonstrate the skills and experience of learning opportunities that can be synthesised into practice. The portfolios will include elements of personal and industry reflection, short answer questions, practical skills assessment and written reports.

The inclusion of oral presentations and mock interviews in the first year will help prepare students for placement application throughout the programme as well as building their confidence in delivering information to industry in the form of business plans, herd and flock health plans and research findings.

The assessment strategy also embeds opportunities for students to achieve practical 'employment ready' vocational skills applicable to agriculture across different modules and levels of the programme. Simultaneously opportunities to develop key graduate attributes such as critical writing, team working, communication and other interpersonal skills are also embedded within modules across each year of the programme to ensure the student can function effectively within the agricultural sector. There will be a number of formative assessment opportunities to support students towards their summative assessment, these will be through academic and practical skills workshops through the Achievement and Success Centre at the institution, on the institution's farm, individual and group tutorials with tutors and industry support during employment on placements.

In response to industry feedback there has been a conscious move through the years of the programme to develop students' autonomy, confidence, critical and problem solving skills with increasing access and involvement with employers in assessment. This will provide students with 'live briefs' for assessment that will allow them to propose solutions to industry specific challenges and scenarios that they will face in their future careers in the industry. This will develop their industry ethos and show them that they can succeed in signposting their personal, academic and professional development

The assessment strategy has been designed to promote effective learning and engagement and to ensure that student knowledge, understanding, abilities and skills required for this programme can be

comprehensively evaluated. In line with the institution's commitment to facilitating equal opportunities, a student may apply for alternative means of assessment if appropriate. Each application will be considered on an individual basis taking into account learning and assessment needs. For further information regarding this please refer to the VLE. The range of assessments utilised are detailed in the following assessment map:

Assessment Map

The programme encompasses a range of **assessment methods** and these are detailed in the following assessment map:

Assessment Map for BSc (Hons) Agriculture (Livestock Production) / BSc (Hons) Agriculture (Livestock Production) (IP)

		Type of Assessment*									
		Unseen Written Exam	Open Book Written Exam	In-class Written Test	Practical Exam	Practical Skills Assessment	Oral assessment and/or presentation	Written Assignment	Report / Project	Dissertation	Portfolio
Compulsory Modules Level 3	Foundation Skills Development	A (25)				B (75)					
	Academic Skills in Practice						A (25)		B (75)		
	Reviewing Literature							A (100)			
	Foundation Agricultural Studies			B (50)			A (50)

	Strategic Management								A (100)		

*Assessment should be shown in terms of either **Written Exams**, **Practical exams**, or **Coursework** as indicated by the colour coding above.

Part 7: Entry Requirements

Applicants will have achieved entry criteria appropriate for the year of entry, which can be found through the institution's website (www.hartpury.ac.uk).

We also welcome applicants from a diverse range of backgrounds who do not have the entry requirements outlined above. Applicants will be considered on the basis of evidence of personal, professional and educational experience which indicates an applicant's ability to meet the demands of the programme. Where appropriate experience or learning has been gained prior to enrolment on the programme RPL/RPEL may be possible.

Applicants whose first language is not English must also gain a minimum IELTS score of 6.0 prior to entry onto the programme.

This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of individual modules can be found in module specifications, available on the Institution's website.

Programme Amendment Log

Programme Title:	BSc (Hons) Agriculture (Livestock Production) (name included 'Applied' until version 3.0)
Programme Code:	BSHCAGLP
Initial Approval Date:	1 st September 2017
Approved by:	Hartpury Curriculum Approval Committee
Approved until:	01 September 2023
Original version number:	V1.0

Changes:

6/7/2020 Module code correct for Professional Practice Project from HAGV7G-30-5 to HAGV7C-30-5

Current version number: 4.2	
Outline Change Details: Assessment for Level 5 optional module Independent Report (HANXR-15-5) changed from 25% exam and 75% coursework to 100% coursework, in line with amendment to module. Interim awards updated in Parts 1 and 3: Higher Education Foundation Certificate added.	
Material Alteration: No	
Rationale: to ensure accuracy	
Change requested by: Ben Brilot <input type="checkbox"/> I can confirm that all programme managers have been consulted and support this change <input type="checkbox"/> I can confirm that student representatives have been consulted about this change <input type="checkbox"/> I have retained evidence of this consultation which has been placed in the Module File	
Signature: 	Date: 28/02/20
Name of Head of Department: <input type="checkbox"/> I confirm that this change does not require additional resources beyond the scope of those already present or planned for by the department	
Signature: 	Date: 28/2/2020
Approval Committee and Date:	CVC Chair's action 2020 03 03
Change approved with effect from:	1 September 2020
Resulting new version number:	4.4 (2019 intake)

Current version number: 4.0
Outline Change Details:
<u>Part 3:</u>

Removal of the optional Level 5 module, Agricultural Technologies.
Removal of optional Level 6 module, People Leadership and Change.

Programme map updated to improve clarity about optional module choices.

Part 4 – Changes made to the matrix to reflect updated programme map

Part 6 – Removal of modules from the assessment map matrix

Part 8 – Section removed in line with current template

Material Alteration: Yes and is accompanied by the relevant course information sheets.

Rationale:

Modules have been updated in response to student feedback. Removal of the optional agricultural technologies module from year two of the programme: feedback from students on the programme last year and from current second years was that the balance of the optional modules on the straight agriculture was restrictive. This resulted in a choice between agronomy and agricultural technologies which proved unpopular as most students wanted to select both modules. There was additional feedback that the technology content could be contextualised in more depth in the production modules.

The new 15 credit module (Vegetable and Soft Fruit Production) added to the second year optional modules reflects the agricultural nature of the local area (Three Counties) and has an international focus as well.

Removal of optional module People Leadership and Change from the final year of the programme: rationale is provided by student reluctance to choose the module. Although this reduces the number of optional modules in the final year, the student feedback has been that there is sufficient choice on the programme.

Change requested by: Philip Watson

- ☐ I can confirm that student representatives have been consulted about this change
- ☐ I can confirm that colleagues impacted by this change have been consulted
- ☐ I have retained evidence of these consultations, which will be summarized within the Programme Enhancement Report

Signature: 

Date: 13/01/2020

Name of Head of Department:

- ☐ I confirm that this change does not require additional resources beyond the scope of those already present or planned for by the department; OR;
- ☐

Signature: 

Date: 13/01/2020

Approval Committee and Date: CVC 2020 01 13

Change approved with effect from: 1 September 2020

Resulting new version number: 4.2 (2019 intake)

Version 4.0

Rationale: After the successful application for University Title, amendments were required to all specifications.

Material Alteration: Yes and Course Information Sheet amended appropriately: Not required

Outline Change Details: 1. Part 1: Basic Data requires the Awarding Body to be amended from Hartpury College to Hartpury University. 2. Award Titles amended to replace (SW) with (IP). 3. Removed BUWE B80 4. Subject Benchmark Statements updated where required.

Change requested by: Academic Registrar

CVC approval date: 31 August 2018

Change approved with effect from:	01 September 2018
New version number:	4.0

Version 3.0

Rationale: The UCAS Course Search mechanism was altered leading up to 2018, and this meant that if a prospective applicant typed in 'Agriculture' the Applied Agriculture (Livestock Production) title was not returned. An amendment was therefore required and following consultation a simpler title of Agriculture (Livestock Production) was chosen.	
Material Alteration: Yes and Course Information Sheet amended appropriately: Yes	
Outline Change Details: Programme title changed from BSc (Hons) Applied Agriculture to BSc (Hons) Agriculture	
Change requested by:	Phillip Watson
CVC approval date:	01 August 2018
Change approved with effect from:	01 September 2018
New version number:	V3.0

Version 2.1

Rationale: Part 3 has been updated to include the optional modules which were initially missed off.	
Material Alteration: No	
Outline Change Details: As above	
Change requested by:	Phillip Watson
CVC approval date:	26 th June 2018
Change approved with effect from:	01 September 2018
New version number:	V2.1

Version 2.0

Rationale: Addition of Foundation Year as an entry point into this programme and therefore this has been reflected in the appropriate sections.	
Material Alteration: Yes and Course Information Sheet amended appropriately: Yes	
Outline Change Details: To increase access and widening participation opportunities for this programme.
