Part 2: Programme Overview

BA (Hons) Sports Business Management graduates demonstrate knowledge of specific business and management principles, together with team working abilities appropriate to future careers. They think creatively, challenge assumptions and can embrace the concepts of risk and innovation. The range of transferable and intellectual skills gained will also prepare and encourage progression to higher levels of study.

Graduates display critical insight into the organisations responsible for sport and the political context in which they operate. By assessing a range of options for solving problems, graduates will consider new ways of defining systems and employ theory to promote the development of sport throughout society. Understanding diversity in terms of people and cultures enable our graduates to effectively communicate using a range of media and adopt an evaluative approach to sources of information.

Graduates have confidence and self-esteem by taking responsibility for their own learning and undertaking a relevant work placement (e.g. linked to topics covered within the programme) to enhance interpersonal skills and effective self-management.

Part 5: Learning, Teaching and Assessment

Learning, Teaching and Assessment Journey:

At Hartpury there is a policy for a minimum average requirement of 15 hours / week in the foundation stage and stage one and 12 hours / week contact time over the course of the full undergraduate programme. This contact time encompasses a range of face-to-face activities as described below. In addition, a range of other learning activities will be embedded within the programme which, together with the contact time, will enable learning outcomes to be achieved and demonstrated.

On the BA (Hons) Sports Business Management programme, teaching is a mix of scheduled, independent and placement learning.

Scheduled Learning

May include lectures, seminars, tutorials, project supervision, workshops, guests and external visits. Scheduled sessions may vary slightly depending on the module choices made. Within the Foundation Year, a feature will be the facilitated workshops enabling students to benefit from small-group study.

Independent Learning

May include hours engaged with essential reading, case study preparation, assignment preparation and completion. These sessions constitute an average time per level as indicated in the table below.

Placement Learning

All students are expected to complete a period of work placement at level 5, and many find this applied experience invaluable when applying for jobs and making career decisions later in the programme.

An optional integrated placement year is included as part of this programme. By the end of the course these students will have benefitted from completing work experience with opportunities to reflect upon their personal development and improving levels of skills relevant to their programme. This experience will give each student a valuable insight into different aspects of industry (national or international) and may have helped formulate ideas of possible careers available following graduation.

International Academic Study

Within this programme there is an opportunity to gain academic credit for a period of studying abroad. The student would be supported through existing partnerships with established institutions. All periods of study abroad would have to meet the institutions requirements before enrolment on the International Academic Study opportunity modules.

Virtual Learning Environment (VLE), or equivalent

This specification is supported by a VLE where students will be able to find all necessary module information. Direct links to information sources will also be provided from within the VLE.

Careers

To support career preparations, personnel are available on-site for group and one to one advice and the students can utilise online resources. Tutors will offer subject specific careers advice through module sessions or individual tutorials. Careers Fairs are arranged periodically to allow students to engage directly with employers from the industry sector.

This programme will be assessed according to the approved Academic Regulations.

Students registered on this programme will have access to the Hartpury University support services.

The distinctive module used by the Programme Examination Board to inform recommending differential awards for students when considering borderline performance profiles will be

New version number:	2.3

Version 2.1 (2018 intake)

Rationale: The development of this programme has occurred following the recent sport business management PCR and the associated outcomes to review the current curriculum (subject areas, assessment and trips).	
<p>The new Research in Professional Practice module will create a context specific level 5 offer allowing the business team to support and prepare students appropriately for dissertation. In addition, combining the Facilities and Hospitality modules at level 5 will amalgamate two current subject areas which have a natural synergy and allow the staff members to derive more value and enhance the student experience from the existing trips. From a strategic perspective, the business department have focused significantly on increasing the application within student assessment and in particular applying theory to industry practice through inquiry based learning. The evolution and continued expansion of technology in sport (materials, VAR, wearable, e-gaming, spectator experience) has created the rationale for a module dedicated to the subject area. The strategic decision to include this at level 4 will allow the business staff to create a foundation level of knowledge and expose new students to the range of technology influences in sport. Furthermore, early exposure to this subject area will enable students to integrate technology concepts within future module assessments (e.g. NVC, facilities and hospitality, sport services sponsorship). Small name changes for 1 level 5 module and 2 level 6 modules.</p>	
Material Alteration: Yes	
<p>Outline Change Details: : 1. Addition of 3 new modules: Introduction to Technology in Sport (HSPV9L-15-4) to replace Sports Facilities Management Research in Professional Practice (HSPV9Y 30 5) to replace Study Trip Sports Facilities and Hospitality Management (HSPV98 30 5) to replace Events Management and Fundraising and Sports Hospitality Management</p> <p>2. Change in title to 3 modules: International Sports Development (HSPXU3-15-5) from Sports Development Organisations and Governance The Impact of Sports Events (HSPV4E-15-6) from The Legacy and Impact of Sports Events Social Media in Sport (HSPV43-15-6 from Media, Technology and Communication in Sport</p> <p>3. Change to assessment in HSPXU3 15 5 International Sports Development to Component A 100% Practical</p>
