## Part 2: Programme Overview

Graduates of BA (Hons) Equine Business Management have developed knowledge and understanding of key sustainable business principles within the equine industry. They have explored and analysed current issues within the equine industry and applied equine science modules in relation to welfare and management requirements of the horse both now and in the future. Graduates have gained extensive practical knowledge and understanding of the equine industry and wider business management approaches and theories, some of which graduates have also been exposed to in their compulsory period of relevant work experience. Graduates have been exposed to live industry projects and expertise from the equine and allied industries in order to develop their own commercial ability to present and create media content to influence others to promote a sustainable and inclusive business environment whilst promoting positive wellbeing of themselves and others around them.

### Learning, Teaching and Assessment Journey:

Having entry points into both a Foundation Year and Level Four, enables the programme experience to facilitate the development of a successful undergraduate supporting a wide range of study backgrounds. The Foundation Year will prepare students with general study skills and opportunities to develop subject specific skills and knowledge. Additionally, the Foundation year includes an internship enabling a student to put their skills into practice and develop an early appreciation of employment opportunities and attributes necessary for enhanced employability. Assessment within the Foundation Year had been designed to prepare a student for the assessment to come in following years. As such, it demonstrates a breadth of type and gradual introduction to the expectations of HE level study.

The BA (Hons) Equine Business Management programme provides a robust underpinning of business principles coupled with a sound knowledge of the equine and wider equine industry. Students benefit from being exposed to developments in wider sport and commercially related business management approaches, bringing wider best practice to the equine context. Novel assessments are incorporated in order to equip and develop transferable skills that are desirable to the employer upon graduation. Optional modules allow students to specialise and tailor their programme to specific areas and career interests within the equine industry or outside it.

This programme incorporates the opportunity to either complete a work placement or study abroad period, allowing students to observe and to put theory into practice. This approach allows students to gain valuable experience, which in turn enhances their employability.

Students may have the opportunity of studying abroad for a semester as part of their stage 2, with Van Hall University of Applied Sciences in the Netherlands. Students will go through a competitive application and selection process for this opportunity to study at the Larenstein Campus, which teaches in English. Students will benefit from studying a combination of modules enabling them to experience the Dutch Equine Industry through Van Hall's excellent links with local, regional and national organisations. They will experience a different culture, living and studying abroad and gain insights into business and work practices internationally. Alternatively, students may identify an alternative study abroad opportunity that they wish to experience. They will have to demonstrate that this opportunity will add to their graduate attributes and skills and future career opportunities before it is considered suitable for use towards international academic study modules.

As students progress to stage 3, the assessments are designed to simulate real-life business challenges in order to ensure that graduates can deal with change, present themselves confidently and be able to produce creative media content. Academic knowledge and understanding will reinforce and support the development of practical skills to equip the student with the knowledge base and skills relevant to this very broad area of applied business management. The programme prepares graduates for the future needs of the equine industry in the UK and abroad.

Overall, the programme combines the development of commercial business awareness alongside underpinning equine knowledge via teaching, research and practical skills to develop a graduate who can make an effective contribution to positively challenge and influence business practice. It has been shown that the balance of skills developed on the programme will also enable graduates to gain employment in other occupational areas, if they so wish.

## Part 5: Learning, Teaching and Assessment

This programme offers the opportunity for students to undertake an approved Exchange Programme, for an agreed period (one/two semesters), of overseas study at a higher education institution studying modules appropriate to their programme aims and which have been pre-approved by the Programme Manager. The Exchange Programme is dependent on an approved agreement between the institution and an approved International Institution for BA (Hons) Equine Business Management.

Those students that successfully undertake a study abroad semester at Van Hall University of Applied Sciences in the Netherlands can achieve up to 60 credits of level 5 Collaborative Scheme Credit. To gain 60 credits the students must enroll and successfully complete a pre-approved combination of modules that must include some credits which are at least level 5. If students do not successfully complete all the pre-approved modules then they will gain Collaborative Scheme Credit equivalent to the study credits achieved as part of this study abroad experience. Collaborative Scheme Credit enables credits to be achieved and these credits contribute to the achievement of an award. These credits will not have marks attributed to them.

This programme will be assessed according to the approved Academic Regulations.

Students registered on this programme will have access to the Hartpury University support services.

The distinctive module used by the Programme Examination Board to inform recommending differential awards for students when considering borderline performance profiles will be Undergraduate Dissertation.
