Part 2: Programme Overview

BSc (Hons) Equine Behaviour and Welfare with integrated placement year graduates can apply scientific principles to management practices, have an ability to influence and have experienced change management projects. They understand the complexity of the equine industry and will have strong awareness of equitation science, combined with the ability to evaluate equine welfare. Graduates have a thorough understanding of equine behaviour via internal and external industry experts and on study trips, whilst utilising welfare measurements and contemporary research in order to understand and evaluate key aspects of the holistic horse-human relationship. Graduates have practical experience of working within the industry.

Part 3: Programme Structure

This structure diagram demonstrates the student journey from enrolment through to graduation for a typical **full time student on the primary programme**, including:

- level and credit requirements
- award requirements that are in addition to those described in the Hartpury University Academic Regulations
- module diet, including core and optional modules.

Please note:

*PAB – these modules are subject to additional and variant regulations as part of an accreditation by a professional accrediting body

+ Non-condonable – these core modules are not able to be condoned

Part 5: Learning, Teaching and Assessment

Learning, Teaching and Assessment Journey:

On the BSc (Hons) Equine Behaviour and Welfare (IP) programme teaching is a mix of scheduled, independent and placement learning:

A key feature of delivery throughout the programme is the application and continual development of practical skills relevant to equine behaviour and welfare within teaching and learning in order to ensure that, upon graduation, students are knowledgeable and practically able to influence and promote ethical management practices. This is achieved through a variety of mechanisms including bringing industry speakers and experts into the classroom, practical workshops, undertaking study trips and visits to relevant establishments, work placement and a year out in industry between stage two and the final stage. Practical opportunities to observe practitioners relative to equine behaviour observations and interventions throughout the programme will produce graduates who can work within and positively influence equine welfare in the global equine industry.

The first stage of the programme aims to establish a foundation knowledge and understanding of how the horse operates including explaining how equine functional anatomy and physiology, nutrition, behaviour and health combine to underpin the initial concepts of horse and human behaviour. This will be achieved through a combination of theory, practical and laboratory sessions, and visits to relevant establishments in the equine industry. The broader professional context of self-reflection and development and the different facets that make up the global industry are also integrated into delivery. Students will also have the opportunity to develop their practical horsemanship skills on the yard. Students' academic and vocational skills are developed through a combination of classroom, practical and industry-based delivery including attendance at workshop sessions.

The second stage takes the fundamental knowledge students have learned in their first year and builds on this by exploring in more detail the key factors and principles that underpin learning theory and cognition. Theoretical delivery is supported by practical opportunities to develop practical skills of behavioural observation and training, as well as to critique management practices using case studies and practical experience on the yard at Hartpury. The period of work placement is an integral part of the second year and will further develop students' understanding of the cultural differences and the dynamic nature of the equine industry.

During the placement year, students will draw on our extensive industry connections to further develop their practical skills and spend time out in the equine industry either in the UK or overseas. This provides an excellent opportunity to apply the theory learnt to this point into practice in a real-world context and to develop valuable industry skills and contacts.

The final stage of the degree examines equine ethics and welfare in more detail. Students are encouraged to further apply theory to practice and engage in problem-based learning in classroom, seminar and practical sessions, to enhance their understanding of the complexities of behavioural study and application. Students will develop their professional skills in order to test out their ability to influence others, underpinned by behavioural research. Case study evaluation and opportunities to view practice will facilitate critical evaluation of management approaches used across different equestrian disciplines as well as completing their own independent research project which can be tailored to their career aspirations in the dissertation module.

Part 5: Learning, Teaching and Assessment

The range and types of assessments will appropriately measure students' achievement of the learning outcomes. The portfolio and oral assessments across Levels four and five will contribute to practical skill development and enhance their recognition and development of transferable skills to support further study and support employment in the equine and allied industries. Assessments in Level six support the development of students' intellectual skills to enable them to propose solutions to real world problems. The dissertation provides an opportunity for students to engage in a supervisor-supported independent research project, which can be tailored to support future employability or progression to post graduate study.

This programme will be assessed according to the approved Academic Regulations.

Students registered on this programme will have access to the Hartpury University support services.

The distinctive module used by the Programme Examination Board to inform recommending differential awards for students when considering borderline performance profiles will be

Research in Equine Behaviour.

*Indicative assessment types for new students enrolling on this programme after the date this specification takes effect (Part 1) are shown in terms of either **Coursework**, **Written Examination**, or **Practical Examination** as indicated by the colour coding above.

This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if they take full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of individual modules can be found through Hartpury's website (www.hartpury.ac.uk).

Approved Programme Amendment Log

Primary Programme Title:	BSc (Hons) Equine Behaviour and Welfare with Integrated Placement Year
Programme Code:	BSHEEBWX
Initial Approval Date:	17 May 2021

Changes: *Most recent at the top of the page*

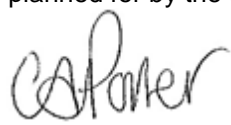

Current version number: 3.0	
Outline Change Details: Assessment Map updates to reflect change in assessment type for Professional Placement Experience in the Equestrian Sector (from Industry Experience Portfolio to Practical Assessment Series).	
Material Alteration: Yes and is accompanied by the relevant course information document.	
Rationale: After running the assessment this year the change of assessment was proposed to better support the pedagogical approach of the module in order to enable module teams to have scope to be in line with industry practice in order to better to support the students learning journey.	
Change requested by: Sophie Armstrong I can confirm that student representatives have been consulted about this change I can confirm that colleagues impacted by this change have been consulted I have retained evidence of these consultations, which will be summarized within the Programme Enhancement Report
