Version	10.0	·	5

Part 2: Programme Overview

A BSc (Hons) Animal Behaviour and Welfare graduate has had the opportunity to expand their knowledge and understanding on a range of animal welfare topics supporting individual interests and career aspirations. Irrespective of subjects chosen, graduates have developed skills in critical enquiry and evaluation of current process and practices in relation to ethology and animal wellbeing. Graduates have acquired current subject knowledge that can be applied to solve challenges within industry. They possess the fundamental vocational skills and graduate attributes to enable them to be an effective team member within research, laboratory, and animal management environments. Graduates have been exposed to a range of welfare assessment practices and are confident to assist with animal welfare assessments. They are also be able to analyse the behaviour of non-human animals and evaluate the role of various welfare assessment techniques within industry.

A BSc (Hons) Animal Behaviour and Welfare with integrated placement year graduate has had the opportunity to expand their knowledge and understanding on a range of animal welfare topics supporting individual interests and career aspirations. Irrespective of subjects chosen, graduates have developed skills in critical enquiry and evaluation of current process and practices in relation to ethology and animal wellbeing. Graduates have acquired current subject knowledge that can be applied to solve challenges within industry. They possess the fundamental vocational skills and graduate attributes to enable them to be an effective team member within research, laboratory, and animal management environments. Graduates have been exposed to a range of welfare assessment practices and are confident to assist with animal welfare assessments. They are also be able to analyse the behaviour of non-human animals and evaluate the role of various welfare assessment techniques within industry.

Part 3: Programme Structure

This structure diagram demonstrates the student journey from enrolment through to graduation for a typical **full time student on the primary programme**, including:

- level and credit requirements
- award requirements that are in addition to those described in the Hartpury University Academic Regulations
- module diet, including core and optional modules.

Please note:

- *PAB these modules are subject to additional and variant regulations as part of an accreditation by a professional accrediting body
- + Non-condonable these core modules are not able to be condoned

	Core Modules	Optional Modules	Target and Interim Awards
	HANV8B-30-3 Academic Skills in Practice	None	Higher Education Foundation Certificate in Academic Skills
	HANVFP-30-3 Foundation Animal Studies OR HANV8G-15-3 Foundation Animal Studies pre-2022 only		Certificate in Academic Skills

HANVKS-45-6 Animal and Agriculture Dissertation+ OR HANV3R-45-6 Undergraduate Dissertation+ pre-2022 only HANV37-15-6 Animal Trade and Welfare+ Science

Students are normally required to select 60 credits from the optional modules listed below:

HANV38-15-6 Anthrozoology

HANV39-15-6 Biodiversity and Conservation

HANV4X-15-6 Cognitive Ethology

HANV3G-15-6 Developments in Animal

HANV3K-15-6 Pet Behaviour Counselling

HANV3N-15-6 Wildlife and Zoo Management

BSc Animal Studies

BSc Animal Studies with integrated placement year

BSc Animal Behaviour and Welfare Must include Animal Trade and Welfare and all core modules at stages 1 and 2.

BSc Animal Behaviour and Welfare with integrated placement year Must include Animal Trade and Welfare, all core modules at stages 1 and 2 and the Integrated Placement Year module.

BSc (Hons) Animal Behaviour and Welfare Must include all core modules.

BSc (Hons) Animal Behaviour and Welfare with integrated placement year Must include all core modules and the Integrated Placement Year module.

Part time:

The part time student journey from entry through to graduation is individually negotiated with the student.

Part 3: Programme Structure for BSc (Hons) Animal Behaviour and Welfare (Level 6 entry)

This structure diagram demonstrates the student journey from enrolment through to graduation for a typical **full time student on the primary programme**, including:

- level and credit requirements
- award requirements that are in addition to those described in the Hartpury University Academic Regulations
- module diet, including core and optional modules.

Please note:

numerical data and conceptual written	Α	Α					Α		Α		Α	Α					Α			Α	В	Α	Α			Α	Α
information towards a given purpose.																											

		1					1													ı						-	
3. Communicate effectively with individuals, establishing professional relationships within the animal management community.		Α		В						В			Α		Α	В	Α	Α	В			Α		Α			
4. Maintain the standards and practices required of the UK Animal industry.	В	Α		В		Α				Α					В	В	В	А				Α		Α	В	В	В
Recognise moral / ethical dilemmas and issues, and show an awareness of sustainable developments in the field of animal science.		Α				Α	Α	Α						Α			В	Α	Α		А	Α		Α	Α		
 Demonstrate a commitment to continuing professional development and lifelong learning through the development of skills in relation to self-directed and independent study. 	В	Α	В	В	В	В	В		В						В	Α	Α	Α	В	В	В	В	В	В		Α	А
7. Work professionally with others as an effective team member.			В					Α					Α	Α			В		В			Α		В			
D) Setting, Personal and Enabling Skills																											
1. Communicate effectively using a variety of means.	Α	Α	Α	Α	Α	Α	Α	Α	Α	Α	Α	Α	Α	Α	Α	В	Α	Α	Α	Α	Α	Α	Α	Α	Α	Α	Α
Evaluate their own academic, vocational and professional performance supported by feedback and personal reflection.		Α							В				В	Α		Α	Α	В							В	Α	В
3. Utilise problem-solving skills in a variety of theoretical and practical situations.	Α	Α	В			В	Α	В	Α	В	А	Α	В	В	Α		Α	А	В			Α		Α	Α	Α	Α
 Manage change effectively and respond to the evolving demands of the industry. 		В				В	Α	В					В				Α	А	В	В				В		В	Α
Take responsibility for personal and professional learning, wellbeing and career development.		Α							В							Α	В	Α								В	В
Understand career opportunities and challenges ahead and begin to plan a career path.		Α							В				В				В	В		В						Α	В
7. Demonstrate information management skills, including: information technology for study or employment in the workplace; library resources; avoiding plagiarism.	В	А					В		Α		В	В					Α	А								В	Α

Part 5: Learning, Teaching and Assessment

Learning, Teaching and Assessment Journey:

The programme utilises a mixture of teaching and assessment approaches which aim to support the student to develop comprehensive knowledge and understanding of the principles of animal behaviour, welfare and ethics. Learning opportunities are varied and typically include lectures, seminars, tutorials, project supervision, demonstrations, practicals, workshops, fieldwork, and external visits. At Hartpury, there is a policy for a minimum average requirement of 15 hours contact time per week in stage one of the full-time undergraduate programme. This contact time encompasses a range of face to face scheduled activities as described below. In addition, a range of other learning activities will be embedded within the programme which, together with the contact time, will enable learning outcomes to be achieved and demonstrated.

Teaching involves a mix of scheduled and independent learning. Scheduled sessions may vary slightly depending on the module choices made. Independent learning includes the hours engaged with essential reading, case study preparation, assessment preparation and completion etc. Throughout their studies, students are encouraged to engage with volunteering opportunities to develop their practice and subject knowledge. Students will develop an ethos for ethical practice within their learning and assessment, with a strong focus on the amelioration of captive animal welfare and study of animal behaviour. Students will experience a variety of assessments in relation to these key themes, including coursework, written examinations, oral presentations, and practical skills logbooks. There will be a range of assessments at each stage to support students to build confidence in applying their written, oral, and practical skills as they progress through the course to enable them to achieve and prepare them for further study or employment in their chosen industry.

Teaching will typically incorporate access to various resources on-site at the institution, including the animal collection, home farm, equine facilities and the wider estate. During their studies, students will typically be supported by academic staff, laboratory staff, and industry-based guest speakers. A range of equipment is available for students to develop their vocational skills in a safe teaching environment. This equipment is updated on a regular basis to reflect current practice in industry, and the needs of research activities. Classrooms are situated throughout the University campus, which allows for a seamless transfer between theory and practical activities. The teaching team have industry-relevant experience that covers all aspects of the programme, and are actively engaged in research and knowledge exchange activities. The teaching and learning strategies employed within modules aim to develop graduates who can recognise trends and patterns, and propose justified solutions to problems related to animal welfare assessment, ethics, and ethology. The programme will have the following distinct features for each stage of delivery:

Foundation Year (Stage 0): The focus will be on establishing clear underpinning knowledge and study skills to support students' progress through higher levels of the programme. Practical and academic skills will be enhanced, through a range of practical sessions and an internship in a chosen area of the campus e.g. animal collection. Students will learn in small groups to develop confidence and interpersonal skills, as well as working alone on projects to develop independent study skills in their own area of interest.

Stage 1: Delivery is focused on providing a scientific foundation to support students' academic and interpersonal skill development. To achieve this, stage 1 concentrates on

the development of fundamental knowledge of animal behaviour and biological science, and the significance of animal welfare across a range of species. Students will also learn how to assess animal health, with consideration of ethical practices that support positive interactions for both human and animal participants. Furthermore, students will explore key principles of biodiversity and be encouraged to develop interpersonal and team-based skills. Intellectual skills are developed through lectures, seminars, practical sessions and academic workshops.

Stage 2: Delivery aims to consolidate the knowledge and skills developed in stage 1. Students will evaluate the benefits and limitations of contemporary animal welfare assessment techniques used in the animal industry, and develop a range of researchoriented skills within a research centred module. Students will also work collaboratively to explore the principles underpinning ethical perspectives and attitudes towards the use of animals in varying contexts. Students continue to apply their knowledge and understanding through evidence-based learning, application of theory into practice, and exposure to a range of speakers. Optional modules allow students to tailor and build their specialist knowledge and begin to focus on their chosen career path, with choices to include application of training techniques, management of captive animals, and fieldoriented behavioural observations. Delivery and assessment will encourage students to develop their autonomy, engage in reflection and will reinforce the competencies developed in stage 1. Assessment will ensure that they have the research skills and knowledge required to start their dissertation project and develop their analysis and evaluation skills to encourage criticality of research and practice to continue to develop at stage 3.

Integrated Placement Year (optional): Students have the opportunity to further develop their employability by choosing to undertake an industry-based work placement module. This will allow students to experience different methods used within ethological, welfare, or ethics related sectors in either a regional, national or international environment. The student is responsible for finding their work placement, but will be supported through their completion of the work placement module.

International Academic Study (optional): Within this programme, there is opportunity to gain academic credit for a period of studying abroad. The student would be supported to identify an opportunity of interest, which may be with established institution partners or by individual arrangement. All periods of study abroad would have to meet the institutions requirements before enrolment on the International Academic Study opportunity modules.

Stage 3: Delivery aims to further provide students with opportunities to apply research and the skills they have developed into practice, facilitating individual specialisation within their chosen career path. The final stage concentrates on the individual development of the student and the expansion of their specialist career path. Taught content will focus on evaluation of emerging issues across national and international animal welfare and trade industries. Students will be encouraged to engage in critical review and evidence-based learning, with opportunities to put this into practice during industry or research focused projects. Optional modules will provide students with opportunities to refine behavioural assessment skills in the diagnosis of common pet behavioural problems, appraise management of animals housed in zoological collections, and critically evaluate the relationship between animals and human keepers.

Virtual Learning Environment (VLE): This specification is supported by a VLE where students will be able to find all necessary module information. Direct links to information sources will also be provided from within a VLE.

Careers: To support students' career preparations, personnel from the careers department will provide students with opportunities to map progress towards chosen career paths and develop effective CVs or interview techniques. Industry professionals will also visit the institution on an annual basis, as part of an Animal Careers Insight day, to support students to develop their employability prospects and engage directly with employers. A range of online resources linked to employability will also be signposted to students via the programme's Moodle page, Innovations, Careers, and Enterprise team, and academic tutors. Tutors will typically offer subject specific careers advice through module sessions or within individual tutorials.

This programme will be assessed according to the approved Academic Regulations.

Students registered on this programme will have access to the Hartpury University support services.

The distinctive module used by the Programme Examination Board to inform recommending differential awards for students when considering borderline performance profiles will be

Animal and Agriculture Dissertation or Applied Research Project

Professional Accrediting Body documents to which this programme is mapped and or aligned:

None.

^{*}Indicative assessment types for new students enrolling on this programme after the date this specification takes effect (Part 1) are shown in terms of either Coursework, Written Examination, or Practical Examination as indicated by the colour coding above.

This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if they take full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of individual modules can be found through Hartpury's website (www.hartpury.ac.uk).

Approved Programme Amendment Log

Primary Programme Title:	BSc (Hons) Animal Behaviour and Welfare
Programme Code:	BSHAABWX
Initial Approval Date:	01 September 2017

Changes: Most recent at the top of the page

Current version number: 8.0

Outline Change Details:

Parts 3, 4 and 5: new module HANVMJ-15-4 Professional and Academic Skills in Biology and replaces HANV69-15-4 Fundamental Skills for the Animal Scientist. New module HANVP4-30-4 Genetics, Evolution and Biodiversity replaces HANXNV-15-4 Animal Genetics and HANXK6-15-4 Biodiversity

HANVMV-15-5 v1_0 - Professional Experience in the Animal Sector 1 added as Stage 2 / Level 5 optional module.

HANXRP-15-5 International Academic Study Portfolio, HANXRQ-30-5 International Academic Study Project and HANXRR-45-5 International Academic Study Extended Project removed as Stage 2 / Level 5 optional modules.

Part 5: Assessment Map updated to reflect module amendments - Stage 1 / Level 4 core module Systems Biology changed from In-Class Tests and Lab Report to Practical Skills Logbook.

Stage 1 / Level 4 core module Animal Health and Disease - Component A changed from Written Examination to Test, Component B changed from Case Study Report to Group Oral Assessment with a group mark.

Stage 3 / Level 6 optional module Anthrozoology changed from Open-Material Written Examination to Seen Open-Material Case Study(s) Written Examination.

Stage 2/ Level 5 optional module Measuring Animal Behaviour changed from Report and Examination to Report.

Level 6 entry module Investigative Skills for the Successful Undergraduate changed from In-Class Test to Test.

Material Alteration: Yes and is accompanied by the relevant course information document.

Rationale: A general Professional and Academic Skills module has replaced all 'Fundamental Skills modules in L4 Animal programmes. Additionally, the evolutionary genetics module replaces the applied animal genetics module in first year for ABW and Zoology. A second year industry experience module has been added, replacing the International Academic study modules. Independent Report has been removed from all Animal programmes from 23-24 onwards.

Change requested by: Ben Brilot

I can confirm that student representatives have been consulted about this change

I can confirm that colleagues impacted by this change have been consulted

I have retained evidence of these consultations, which will be summarized within the Programme Enhancement Report

Signature: B Brilot Date: 21/11/22

Name of Head of Department: Wanda McCormick

I confirm that this change does not require additional resources beyond the scope of those already present or planned for by the department

Signature: Date: 10/11/22

Approval Committee and Date:	CVC 2023 03 17
Change approved with effect from:	01 September 2023
Resulting new version number:	10.0 (2023 intake onwards)

23/09/2022: Part 3 Programme Structure— Stage 0 (Foundation year) transition modules added - HANV8G-15-3 Foundation Animal Studies and HANV8A-30-3 Foundation Skills Development - as previously omitted in error. Approved by CSP Chair's action 2022 09 23

20/04/2022 - Part 3: module code for New Venture Creation corrected from HANXTX-15-5 to HSPXTX-15-5

Current version number: 7.1						
Outline Change Details: Transfer onto the new template, as a result of the curriculum refresh. Parts 3, 4 and 5: HANVKS-45-6 Animal and Agriculture Dissertation replaces HANV3R-45-6 Undergraduate Dissertation; HANVKV-15-5 Research Methods for Agricultural and Animal Scientists replaces HANXU5-15-5 Undergraduate Research Process. Level 6 optional module HANV3M-15-6 Undergraduate Independent Study removed. Animal Psychology module title changed to Cognitive Ethology and changed to one point of assessment – Report. Parts 1 and 3 – interim awards updated, including addition of new 30 credit Certificate in Academic Skills. Part 5: assessment for Foundation Biological Principles Component B changed from portfolio (coursework) to test series (written exam); level 4 core module HANXNS-30-4 Animal Behaviour assessment weightings changed from 40% written exam and 60% report to 50:50; Level 5 optional module Management of Domestic Animals Component A changed from practical skills assessment to written exam.						
Material Alteration: Yes, and is accompa	anied by the relevant course information documents.					
Rationale: Programme documentation updated in line with the curriculum refresh project. This ensures that the skills developed by students during the programme and the wider student experience is more transparent and clearly highlighted. The new departmental specific modules mentioned above will support on-going student growth and provide an enhanced student experience through delivery of subject specific content. Change requested by: John Binks I can confirm that student representatives have been consulted about this change I can confirm that colleagues impacted by this change have been consulted I have retained evidence of these consultations, which will be summarized within the Programme						
Enhancement Report

Signature:	Date: 24/01/2022					
Approval Committee and Date:	Refresh Approval Panel action 2022 03 21					
Change approved with effect from:	01 September 2022 (2020 intake onwards)					
Resulting new version number:	8.0					

Current version number: 6.9
Outline Change Details:
Parts 3 and 6 updated in line with module amendments:
HANVG4-15-3 Foundation Skills Development
Module code changed from HANV8A-30-3 to HANVG4-15-3 - reduced to 15 credits.
Assessment component A changed from written exam to in class test.
HANVFP-30-3 Foundation Animal Studies
Module code changed from HANV8G-15-3 to HANVFP-30-3 - increased to 30 credits.

Assessment component B changed from in class test to written examination.

Level 5 optional module HANXSR-30-5 changed from Behavioural and Evolutionary Ecology to

Behavioural Ecology. Assessment component A (written exam) weighting changed to 50%. Component B changed from report to oral presentation and weighting changed to 50%.

Part 6: Assessment map

Level 4 compulsory module Animal Behaviour component A weighting changed to 40. Component B changed to 60 (report).

Level 5 optional module Measuring Animal Behaviour - Component A (in class test) weighting changed to 30%. Component B (report) added.

Parts 1 and 3: Foundation interim award updated to Higher Education Foundation Certificate in Academic Skills.

Material Alteration: Yes

Rationale:

Parts 3 and 6 updated to reflect module changes: modules amended in response to students' request for more subject-specific content in the Foundation year second semester.

Interim award: after a review of the interim award titles, it was agreed this revised title provided better clarity.
