Part 2: Programme Overview

BSc (Hons) Agriculture (Livestock Production) graduates can identify the diversity of the agricultural industry across local, national and global sectors and have developed a comprehensive knowledge and understanding of key issues affecting livestock production and agriculture. They are aware of the importance of sustainable development goals and the wellbeing of people within agriculture, the consumers, the environment and agricultural business. Graduates are confident in planning, implementing and evaluating management practices and core livestock production principles, have the ability to identify, interpret and critique industry and academic research and understand the role of new and emerging technologies informing best agricultural practice and in supporting proposed solutions to problems. They have the ability to apply their knowledge and understanding into practice and reflect on how their personal experiences within industry has been pivotal to their career development and progression.

Part 3: Programme Structure

This structure diagram demonstrates the student journey from enrolment through to graduation for a typical **full time student on the primary programme**, including:

- level and credit requirements
- award requirements that are in addition to those described in the Hartpury University Academic Regulations
- module diet, including core and optional modules.

Please note:

*PAB – these modules are subject to additional and variant regulations as part of an accreditation by a professional accrediting body

+ Non-condonable – these core modules are not able to be condoned

| D) Setting, Personal and Enabling Skills | | | | | | | | | | | | | | | | | | | | | | | |
| Communicate effectively through written and verbal means with Livestock production sector and the wider agricultural industry. | | | | | | В | | В | | В | В | | | | | В | A | | В | A | | | A |
| Prepare and present data using a range of sources and techniques for peers, enterprise managers and the agricultural industry. | | | | | | A | В | В | В | В | | | | | | A | A | В | В | В | В | В | A |
| Utilise problem-solving skills in a variety of theoretical and practical situations. | | | | | | А | | | | | | | A | A | | | А | | A | А | А | В | В |
| Take responsibility for own and others wellbeing, own personal and professional learning and development setting realistic targets to achieve goals and responsibilities with a positive intent. | В | | | | | | | | | | | | A | A | A | | A | | | | | | |
| Manage time effectively in order to prioritise workloads during Livestock production within agriculture in order to meet targets and objectives | | B | | | | A | | В | В | В | | | В | В | В | | A | | | | | В | В |
| Possess the ability to work successfully both independently or as part of a team within the livestock sector or within farm management | В | A | A | В | В | A | В | В | В | В | В | В | A | A | В | | A | A | A | A | В | | |

Part 5: Learning, Teaching and Assessment

Learning, Teaching and Assessment Journey:

The Agriculture (Livestock Production) programme utilises a mixture of teaching approaches which aim to support the student to develop a comprehensive knowledge and understanding of the principles of agriculture. Learning opportunities are varied with students able to apply theory to practice on the institution's farm, during industry engagement, and through periods of work placement and study exchanges. The teaching and learning strategies employed within modules, aims to develop a scaffolding of practice through the degree to support students to prepare for differing assessment types, industry engagement and research. This will include formative feedback on oral presentations, written reports and coursework during individual and group discussions. This will result in graduates who can assimilate complex paradigms and propose justified solutions to problems related to agriculture and be work ready.

The Agriculture (Livestock Production) programme will have the following distinct unique selling points for each year of delivery:

<u>Stage 0:</u> Delivery focuses on developing a foundation in scientific and academic knowledge alongside a grounding in vocational skills.

The Foundation Year will prepare students with general study skills and opportunities to develop subject specific skills and knowledge. Additionally, the Foundation year includes an internship enabling a student to put their skills into practice and develop an early appreciation of employment opportunities and attributes necessary for enhanced employability.

<u>Stage 1</u>: Delivery is focused on building a practical and scientific foundation in agriculture to support students' academic and interpersonal skill development alongside vocational competency.

To achieve this, the first year takes an experiential approach to learning and concentrates on the development of fundamental knowledge and understanding of the agricultural industry and intellectual skills through lectures, seminars, practical and academic workshops and industry engagement. This enables students to analyse, evaluate and synthesise information and opportunities are provided for students to apply the knowledge they have gained into practice on the institution's farm, that consists of a range of mixed enterprises (dairy, sheep, beef, and arable), and through visits to external farms and industry. Access to a skills development bursary will also allow students to undertake and achieve industry recognised competency certificates to support their work readiness.

<u>Stage 2</u>: Delivery aims to consolidate the practical and vocational skills developed in the first year of study within industry environments. Students are encouraged to evaluate the impact and constraints of management systems and practices within the livestock production.

In the second year, students continue to apply their knowledge and understanding through evidence-based learning, application into practice and exposure to best practice through a range of visits to industry and guest speakers. Optional modules allow students to tailor and build their specialist knowledge and begin to focus on their chosen career path. Delivery will encourage students to develop their autonomy, engage in reflection and will reinforce the competencies developed in year one. There are also opportunities for students to undertake international study or professional practice within the industry. International study opportunities enable the students to experience a different culture and develop an international perspective of the agricultural industry. This will allow them to apply different production and management techniques and strategies to propose solutions

Part 5: Learning, Teaching and Assessment

to industry problems as well as gain professional practice experience which will apply their knowledge and understanding within industry and will develop their academic and vocational skills.

Integrated Placement Year (optional): Students have the opportunity to further develop their employability and can experience different livestock husbandry and livestock production methods used within modern sustainable agriculture within a regional, national or international environment.

Stage 3: Delivery aims to provide students with opportunities to apply research and the skills they have developed into practice facilitating individual specialisation within their chosen career path.

The final year concentrates on the individual development of the student and the expansion of their specialist career path. Students will engage with an extended period of work placement which will refine their ability to work effectively in Livestock production sectors of industry and further develop core graduate attributes to support employability. Taught content will focus on evaluation of emerging issues within livestock production across the diversity of global agriculture and students will be encouraged to engage in critical review and evidence-based learning, with opportunities to put this into practice provided during industry or research focused projects within their specialist sector.

This programme will be assessed according to the approved Academic Regulations.

Students registered on this programme will have access to the Hartpury University support services.

The distinctive module used by the Programme Examination Board to inform recommending differential awards for students when considering borderline performance profiles will be

Animal and Agriculture Dissertation or Undergraduate Dissertation or Applied Research Project

Approved Programme Amendment Log

| Primary Programme Title: | BSc (Hons) Agriculture (Livestock Production) (name included 'Applied' until version 3.0) |
|--------------------------|----------------------------------------------------------------------------------------------|
| Programme Code: | BSHCAGLP |
| Initial Approval Date: | 01 September 2017 |

Changes: Most recent at the top of the page

Current version number: 6.0

Outline Change Details:

Part 3: Programme Structure - Stage 2 / Level 5 core modules Research Methods for Agricultural Scientists and Undergraduate Research Process, and Level 6 entry module Investigative Skills for the Successful Undergraduate changed from non-condonable to condonable.

Do the changes presented alter the mapping against the Hartpury University Curriculum Framework (delete as appropriate)? No

If yes, please provide the details of the changes:

Material Alteration: No

Rationale:

It is now considered that this module can be condoned without altering students' ability to satisfy the programme learning outcomes.

Change requested by: Ben Brilot

I can confirm that student representatives have been consulted about this change I can confirm that colleagues impacted by this change have been consulted

I have retained evidence of these consultations, which will be summarized within the Programme Enhancement Report

Signature: B Brilot

Name of Head of Department: Wanda McCormick

I confirm that this change does not require additional resources beyond the scope of those already present or planned for by the department

| Signature: | Date: 12/06/23 |
|-----------------------------------|-------------------------------|
| Approval Committee and Date: | CSP Chair's Action 2023 06 19 |
| Change approved with effect from: | 19 June 2023 |
| Resulting new version number: | 6.1 (2020 intake onwards) |

Part 3: module code for Developments in Livestock Production corrected from HAGV7E-15-6 to HAGV7J-15-6 Amendment approved by Deputy CVC Chair's action 30/06/2022

Current version number: 5.3

Outline Change Details:

Document amended to meet requirements of new 2022 template.

Parts 3, 4 and 5: HANVKV-15-5 Research Methods for Agricultural and Animal Scientists added as Level 5 core module; HANVKS-45-6 Animal and Agriculture Dissertation added as Level 6 core module. Parts 1 and 3 – interim awards updated, including addition of new 30 credit Certificate in Academic Skills. Part 5: assessment for Level 4 core module Skills Development for Agriculture changed from practical skills

assessment to coursework portfolio. Level 6 entry route added including option of two core modules (Applied Research Project and Investigative

Level 6 entry route added including option of two core modules (Applied Research Project and Investigative Skills for the Successful Undergraduate) instead of a 45 credit dissertation.

Date: 12/06/23

| mange approved with effect from. | imber: 6.0 (2020 intake onwards) | |
| Resulting new version number: | 6.0 (2020 intake onwards) | |

Outline Change Details: Part 6: Assessment Strategy - changed Supply Chain Management (Component A) from 100% oral presentation to 100% practical skills assessment.

Part 3: removal of credit requirements in line with current template.

Added Vegetable and Soft Production (HAGVD7-15-5) as an optional module at level 5.

Material Alteration: Yes

Rationale: During the COVID pandemic the oral presentation (Supply Chain Management) was replaced with a practical skills assessment. The feedback from the two cohorts of students who have completed the module was positive to the change. They stated that it allowed them to compile an industry style report of worth that replicated tasks that would be expected of an enterprise manager or assistant farm manager. Vegetable and Soft Fruit has been added as an optional module at the request of students who recognise that vegetables are grown as a supplementary feed for livestock.

| Outline Change Details: |
| Part 6 Assessment map |
| Amendment to assessment map for the Farm Business Management module (HAGV78-30-5). |
| Component A amended to 40% from 50% and component B amended to 60% from 50%, to reflect the |
| adjustment to the assessment weightings. |
| Undergraduate Research Process changed from A to A/B, to reflect modules changes. |
| Parts 1 and 3: Foundation interim award updated to Higher Education Foundation Certificate in Academic |
| Skills. |
| Material Alteration: Yes |
| Rationale: The changes proposed to the assessment element (increased timing for component B and |
| reduced time for component A) of the Farm Business Management module will support students to |
| demonstrate their knowledge, understanding and application in management strategies and allow them time |
| to defend their proposals in the presentation. |
| Interim award: after a review of the interim award titles, it was agreed this revised title provided better clarity. |

| Resulting new version number: | 5.0 (2020 intake onwards) | |
| | | |
| Current version number: 4.5 | | |
| Outline Change Details: Part 6 Assessment - Ass | | |
| e , , , | nt A from a seen examination to an oral presentation. | |
| Parts 3, 4, 5 & 6: Module HANVK6-15-5 name change | ged from Year Work Placement to Integrated | |

Placement Year, in line with module amendment.

Part 3: placement changed from 40 weeks to 24 weeks, in line with module amendment.

Part 6: assessment for component A of module HANV8E-30-3 Foundation Biological Principles amended from practical exam to practical skills assessment, in line with module amendment.

Material Alteration: Yes and is accompanied by the relevant programme specifications and course information sheets.

Rationale: Following student and industry feedback on assessment it is proposed to align the assessment strategy more with industry practice. Therefore, assessing the students in a manner that they will encounter in the industry post-graduation, through the completion of an industry based reflective report and an oral presentation of key findings from research to stakeholders in the pig and poultry sectors of industry. The proposed strategy will further allow the students to apply their knowledge and understanding and critically evaluated information under questioning.

| Resulting new version number: | 4.5 (intakes 2020+) | |
| Current version number: 4.0 | ded the new module (Introduction to Agricultural Economics) in year | |
| Outline Change Details : <u>Part 3</u> : Included the new module (Introduction to Agricultural Economics) in year one of the programme structure and amended the credit value for Skills Development for Agriculture to 30 credits (from 45) and module code changed to HAGVD8-30-4 (from HAGV74-45-4). These changes are included following discussion with current cohorts of students whom felt that the skills module, whilst highly relevant, was too long and often encountered repetition. Discussion with second year students identified the lack of a business module in year one that would prepare students for the farm business management module in year two. Reducing the skills development module to 30 credits will allow for the inclusion of the additional 15 credit module. | | |
| Removal of the agricultural technologies module from year two of the programme. Feedback from students on the programme last year and from current second years was that the balance of the optional modules on the straight agriculture was restrictive. This resulted in a choice between agronomy and agricultural technologies which proved unpopular as most students wanted to select both modules. There was additional feedback that the technology content could be contextualised in more depth in the production modules. Removed People Leadership and Change from the final year of the programme. Rationale is provided by student reluctance to choose the module. Although this reduces the number of optional modules in the final year the student feedback has been that there is sufficient choice on the programme. | | |
| Part 4 Changes made to the matrix to include additional module and those removed | | |

Part 6 – Removal of modules from the assessment map matrix and the inclusion of the new modules

Part 8 – section removed in line with current template

| CVC approval date: 3 | 31 August 2018 |
| Change approved with effect from: 0 | 01 September 2018 |
| New version number: 4 | 4.0 |

Version 3.0

Rationale: The UCAS Course Search mechanism was altered leading up to 2018, and this meant that if a prospective applicant typed in 'Agriculture' the Applied Agriculture (Livestock Production) title was not returned. An amendment was therefore required and following consultation a simpler title of Agriculture (Livestock Production) was chosen.

 Material Alteration:
 Yes and Course Information Sheet amended appropriately:
 Yes

 Outline Change Details:
 Programme title changed from BSc (Hons) Applied Agriculture to BSc (Hons)

 Agriculture
