Version	5.3		

The BSc (Hons) Equine Performance and Rehabilitation with integrated placement year produces graduates who understand the global complexity of the equine industry and who are capable of working within it. Graduates have professional skills aligned to a set of industry informed practical competences and as such, will be capable of implementing a rehabilitation programme, including use of therapeutic modalities under the guidance of a veterinary surgeon or accredited paraprofessional. Graduates have been exposed to the latest scientific and practical approaches within equine training and management. Graduates have an in-depth knowledge and understanding of the facets of retrospective and predictive analysis that can be used to promote successful performance. Graduates can think constructively and critically to discuss and evaluate concepts and theories in the field of equine rehabilitation, enabling them to propose and rationalise rehabilitation regimens that promote injury prevention and the successful return of the injured horse to its primary function.

# Part 3: Programme Structure

This structure diagram demonstrates the student journey from enrolment through to graduation for a typical **full time student on the primary programme**, including:

- level and credit requirements
- award requirements that are in addition to those described in the Hartpury University Academic Regulations
- module diet, including core and optional modules.

# Please note:

\*PAB these modules are subject to additional and variant regulations as part of an accreditation by a professional accrediting body

+ core modules marked + are not eligible for compensation

<sup>1</sup> these modules are accredited by a professional awarding body, but are not subject to variant regulations

<sup>AV</sup> these modules are subject to additional and variant regulations but are not accredited by a professional awarding body.

	Core Modules	<b>Optional Modules</b>	Target and Interim Awards
Stage 0	Core Modules HANVRD-30-3 Professional Development in Practice OR HANV8B-30-3 Academic Skills in Practice (Internship) pre- 2024 only HANVQK-30-3 Biological Principles for Land-Based Scientists OR HANV8E-30-3 Foundation Biological Principles pre-2024 only HANVQX-15-3 Academic Literacy for University Studies OR HANVG4-15-3 Foundation Skills Development pre-2024 only HEQVSC-30-3 Equine Studies OR HANVFE-30-3 Foundation Equine Studies pre-2024 only	Optional Modules

# Teaching and learning strategies to enable learning outcomes to be achieved and demonstrated

A key feature of delivery throughout the programme is the application and continual development of practical skills relevant to equine performance and rehabilitation within teaching and learning in order to ensure that, upon graduation, students are knowledgeable and practically competent to handle horses in rehabilitation settings and apply prescribed treatments. This is achieved through a variety of mechanisms including bringing industry speakers and experts into the classroom, practical workshops, undertaking study trips and visits to relevant performance and equine rehabilitation establishments, work placement and a year out in industry between stage two and the final stage. Practical opportunities to observe practitioners and develop skills in line with industry derived practical competences in relation to equine rehabilitation and performance analysis techniques throughout the programme will produce graduates who can work within and positively influence equine performance and rehabilitation in the global equine industry.

During each stage of their programme a student will be allocated an academic personal tutor.

Within the Foundation stage students are supported to adjust to studying at University through spiral induction and embedded academic personal tutoring activities that facilitate the development of skills essential to academic study and professional success.

Stage one of the programme aims to establish a foundation knowledge and understanding of how the horse operates including explaining how equine functional anatomy and physiology, nutrition, behaviour and health combine to underpin performance and success. This will be achieved through a combination of theory, practical and laboratory sessions, and visits to relevant establishments in the equine industry. The broader professional context of client liaison and the different facets that make up the global industry are also integrated into delivery. Students will also have the opportunity to develop their practical horsemanship skills on the yard or in conjunction with the Equine Therapy Centre to expand their initial experience in ground schooling. Students' academic and vocational skills are developed through a combination of classroom, practical and industry-based delivery including attendance at workshop sessions.

In the second stage, students build on fundamental knowledge they have learned in their first stage and expand on this by exploring in more detail the key factors and principles that underpin training and make a successful performance horse. Theoretical delivery is supported by practical opportunities to develop practical competency in the skill of ground schooling a horse for rehabilitation and to engage in performance analysis across a range of physiological and biomechanical tools, as well as to critique rehabilitation practices using case studies and practical experience in the institution's Equine Therapy Centre. The period of work placement and an opportunity to take a study tour visiting a range of rehabilitation establishments is an integral part of the second year and will further develop students' understanding of the cultural differences and the dynamic nature of the equine industry.

Students will draw on our extensive industry connections to further develop their practical competency and spend time out in the equine industry through a placement year in an approved rehabilitation setting, either in the UK or overseas. This provides an excellent opportunity to apply the theory learnt to this point into practice in a real-world context and to develop valuable industry skills and contacts.

In the final stage students examine equine performance in more detail. Students are encouraged to apply theory to practice and engage in problem-based learning in classroom, seminar and practical sessions, to enhance their understanding of injury and disease, and veterinary and industry approaches to managing these to promote a successful return to competition. Students will develop their practical skill in practical sessions to be able to show improvement in the horse and evaluate fitness. This will be complemented with workshop sessions to apply therapeutic modalities under the direction of a veterinarian or paraprofessional to develop practical competence. Case study evaluation and opportunities to view practice will facilitate critical evaluation of rehabilitation approaches used across different equestrian disciplines as well as completing their own independent research project which can be tailored to their career aspirations in the dissertation module.

The range and types of assessments will appropriately measure students' achievement of the learning outcomes. The portfolio across stage one and two will contribute to practical skill development and assessment, and enhance their recognition and development of transferable skills to support further study and support employment in the equine and allied industries. Assessments in the final stage support the development of students' intellectual skills to enable them to propose solutions to real world problems. The dissertation provides an opportunity for students to engage in a supervisor-supported independent research project, which can be tailored to support future employability or progression to post graduate study.

The programme structure is designed to produce graduates who demonstrate the following practical competences upon graduation (full breakdown of skills and guidance given in Part 6):

- 1. Recognise health and wellbeing status of the horse
- 2. Recognise and assess normal and abnormal behaviour
- 3. Be able to recognise pain and understand when veterinary intervention may be required
- 4. Be able to demonstrate safe lungeing
- 5. Have a knowledge of lameness and be able to say if worsening or improving
- 6. Be able to work the horse in its basic paces, in hand and on the long-reins

7. Be able to assess the horse and discuss its way of going, suggesting and demonstrating exercises to improve

8. Be able to select and fit equipment for specific rehabilitation requirements

9. Be able to keep effective records to monitor progress of a rehabilitation programme 10. Be able to show improvement in the horses' way of going and be confident to alter and use equipment as needed including long-reining and lungeing over poles

11. Evaluate the fitness level of the horse at the latter stages of a rehabilitation programme

12. Effectively implement Electro-Physical Agents as part of a prescribed rehabilitation programme under the direction of a veterinary surgeon or paraprofessional

This programme will be assessed according to the approved Academic Regulations.

Students registered on this programme will have access to the Hartpury University support services. Students have access to the University Learning Centre (ULC) to support their studies.

# Part 5: Learning, Teaching and Assessment

The distinctive module used by the Programme Examination Board to inform recommending differential awards for students when considering borderline performance profiles will be:

Equine Rehabilitation in Practice

L			

			Adjust circle size
8.0	Be able t	to select and fit equipment for speci	
	<u> </u>		
	8.1	Demonstrate and evaluate the use of a range of training aids for lunging	Range = 2 or more Training aids may include: • Side reins (variation of positions) • Pessoa
			<ul><li>Whittaker</li><li>Chambon</li><li>Harbridge</li></ul>
	8.2	Assess and evaluate the horse's way of going	<ul> <li>Way of going to include:</li> <li>Informed observation of the horse working in walk, trot and canter</li> <li>Comparison of way of going on both reins</li> <li>With and without selected training aid</li> </ul>
9.0	Be able	to keep effective records to monitor	progress of a rehabilitation programme
	9.1	Keep records in accordance with the Data Protection Act (2018) and be able to describe the relevance of General Data Protection Regulation (GDPR)	<ul> <li>Accurately update records on a suitable template understandable to all relevant parties</li> <li>Understand the professional and legal obligation to keep an accurate record of interaction with clients/patients</li> </ul>
	9.2	Prepare accurate clinical and client records and maintain detailed records of client/patient interactions	<ul> <li>Written records should be:</li> <li>legible and written in permanent ink</li> <li>include date and time of interaction</li> <li>signed at the end of each entry</li> </ul>
	9.3	Communicate effectively in a professional manner with owners, the public, veterinary surgeons and paraprofessionals, using language appropriate to the audience concerned	<ul> <li>Appropriate awareness and use of body language</li> <li>Ability to orally communicate and influence effectively</li> </ul>
		o show improvement in the horses' equipment as needed including long	way of going and be confident to alter reining and lunging over poles
	10.1	Demonstrate techniques appropriate for the horse	<ul> <li>Techniques to include:</li> <li>Handling of equipment</li> <li>Stance, authority</li> <li>Appropriate circle size</li> <li>Side reins attached appropriately</li> <li>Working at relevant rhythm and tempo</li> <li>Work over poles (as appropriate)</li> <li>Developing balance</li> </ul>
	10.2	Evaluate the effectiveness of the session	<ul> <li>May include:</li> <li>Reflection on the content of session</li> <li>Logical sequence and timing</li> <li>Debate of effectiveness of exercises chosen</li> </ul>

10.3	Develop a plan for progression	<ul> <li>Identify strategies to improve personal performance</li> <li>Identify effective techniques use</li> <li>Plan to include:</li> </ul>
11.0 Evalua		<ul> <li>Identify areas for improvement</li> <li>Consider progression for future sessions for the development of the horse</li> </ul>
	ate the fitness level of the horse at la	ter stage of a rehabilitation programme
11.1	Measure recovery and explain monitoring principles for 24 – 48 hours post training	<ul> <li>Be able to measure HR (in the stationary and exercising horse) and</li> <li>Be able to measure Respiratory Rate (stationary horse)</li> <li>Be able to evaluate for pain behaviour during exercise</li> </ul>
11.2	Demonstrate and explain how parameters such as duration, distance, speed and intensity can be measured	<ul> <li>Utilise performance analysis equipment</li> <li>Be able to interpret performance analysis software</li> <li>Understand and use current biomechanical measurements</li> </ul>
11.3	Explain principle of undertraining and overtraining and how this relates to rehabilitation	
11.4	Explain adaptation to exercise and how to progress / regress exercise programme	
		ts* as part of a prescribed rehabilitation
	me under the direction of a veterinal	ry surgeon or para professional
12.1	Understand the rationale for selection of specific modalities	
12.2	Explain contra-indications and precautions of therapeutic modalities	
12.3	Be able to operate equipment select prescribed parameters and any associated such as ultrasound gel	
12.4	Apply the modality considering horse and own positioning in relation to equipment and factors such as electricity supply.	
12.5	Explain how the modality can be safely removed if required and report on adverse reactions.	
electrical or lig	arily used in physiotherapy practice as	siological effects and therapeutic benefits.

eg laser, ultrasound, TENS/NMES, PEME

### **Approved Programme Amendment Log**

	BSc (Hons) Equine Performance and Rehabilitation with Integrated Placement Year	
Programme Code:	BSHEEPRX	
Initial Approval Date:	30 April 2020	

#### Changes: Most recent at the top of the page

#### Current version number: 5.2

#### Outline Change Details:

Part 5: Assessment Map - change to Stage 2 / Level 5 module Research Methods for Equine Science assessment weightings from 50:50 to 60:40, in line with module amendment.

Part 5: Learning, Teaching and Assessment – reference to 15 hours per week contact time removed, as no longer applicable.

# Do the changes presented alter the mapping against the Hartpury University Curriculum Framework (delete as appropriate)? No

#### If yes, please provide the details of the changes:

#### Material Alteration: No

#### Rationale:

The weighting of component A and B on Research Methods for Equine Science has been updated to reflect assessment changes to the module to support student skill development.

#### Change requested by: Anke Twigg Flesner

- / I can confirm that student representatives have been consulted about this change
- / I can confirm that colleagues impacted by this change have been consulted
- I have retained evidence of these consultations, which will be summarized within the Programme Enhancement Report

#### Signature: Anke Twigg-Flesner

Date: 19/06/2025

Date: 03/07/25

# Name of Head of Department: Catherine Porter

I confirm that this change does not require additional resources beyond the scope of those already present or planned for by the department

Signature:

Approval Committee and Date:	CSP 2025 07 09
Change approved with effect from:	01 September 2025
Resulting new version number:	5.3 (2022 intake onwards)

#### Current version number: 5.1

**Outline Change Details**: Part 1 and 3 interim titles updated in line with changes to Hartpury Academic Regulations- Undergraduate Award in Equine Studies and Higher Education Foundation Award added, Certificate in Academic Skills removed.

Do the changes presented alter the mapping against the Hartpury University Curriculum Framework (delete as appropriate)? No

If yes, please provide the details of the changes:

Date: 04-03-25

Date: 13/03/25

Material A	Iteration	No
------------	-----------	----

# **Rationale: Ensure accuracy**

#### Change requested by: RCollins

- N/A I can confirm that student representatives have been consulted about this change
- <u>N/A</u> I can confirm that colleagues impacted by this change have been consulted
- N/A I have retained evidence of these consultations, which will be summarized within the Programme **Enhancement Report**

**RCollins** Signature:

Name of Head of Department: Catherine Porter

I confirm that this change does not require additional resources beyond the scope of those already present or planned for by the department;

Signature:

**Approval Committee and Date:** CVC Chair's action (SD) 2025 04 07 Change approved with effect from: 01 September 2025 Resulting new version number: 5.2 (2022 intake)

#### Current version number: 5.0

#### **Outline Change Details:**

Part 3: Programme Structure - Stage 3 / Level 6 optional modules Undergraduate Independent Study module code changed from HANV3M-15-6 to HEQVKF-15-6, to reflect module amendment.

Do the changes presented alter the mapping against the Hartpury University Curriculum Framework (delete as appropriate)? No

#### Material Alteration: No

Rationale: to ensure accuracy following module amendment resulting from a change of department following a review of shared modules, this module has been moved to the Equine department as it now only contributes toward Equine programmes.

#### Change requested by: Catherine Porter

- I can confirm that student representatives have been consulted about this change
- I can confirm that colleagues impacted by this change have been consulted
- I have retained evidence of these consultations, which will be summarized within the Programme **Enhancement Report**

#### Current version number: 4.2

#### **Outline Change Details:**

Parts 3 and 5 updated to reflect changes to Stage 0 / Level 3 modules:

HANVQX-15-3 Academic Literacy for University Studies replaces HANVG4-15-3 Foundation Skills Development; HANVRD-30-3 Professional Development in Practice replaces HANV8B-30-3 Academic Skills in Practice; HANVRR-15-3 Exploring Current Concepts replaces HANV8C-15-3 Reviewing Literature; HANVQK-30-3 Biological Principles for Land-Based Scientists replaces HANV8E Foundation Biological Principles; HEQVSC-30-3 Equine Studies replaces HANVFE-30-3 Foundation Equine Studies. Part 5: Learning, Teaching and Assessment - text regarding academic personal tutoring added.

Do the changes presented alter the mapping against the Hartpury University Curriculum Framework (delete as appropriate)? No

If yes, please provide the details of the changes:

Material Alteration: Yes and is accompanied by the relevant course information document.

#### Rationale:

to ensure accuracy following review of Level 3 modules.

#### Change requested by: Lucy Ractliffe

- I can confirm that student representatives have been consulted about this change NO I can confirm that colleagues impacted by this change have been consulted
- I have retained evidence of these consultations, which will be summarized within the Programme Enhancement Report

Date: 15/11/2023

### Name of Head of Department: Catherine Porter

()

I confirm that this change does not require additional resources beyond the scope of those already present or planned for by the department;

Signature:	Date: 30/11/23
Approval Committee and Date:	CVC Chair's action 2024 01 10
Change approved with effect from:	01 September 2024
Resulting new version number:	5.0 (2021 intake onwards)

#### **Current version number: 4.1**

#### **Outline Change Details:**

Parts 3, 4 and 5: Stage 2 / Level 5 optional module HANV68-15-5 Introduction to Hydrotherapy module name changed to Introduction to Animal Hydrotherapy.

Part 5: Assessment Map updated to reflect amendment to Stage 2 / Level 5 optional module Introduction to Animal Hydrotherapy (Component B – Oral Presentation– removed).

Do the changes presented alter the mapping against the Hartpury University Curriculum Framework (delete as appropriate)? Yes/No

If yes, please provide the details of the changes:

Material Alteration: Yes and is accompanied by the relevant course information document.

Rationale:

Changes in the Programme Assessment Map to accurately reflect the changes to the individual modules, which were made to improve students' experience and reduce their workload throughout the year.

Change approved with effect from:	1 September 2020
Resulting new version number:	1.3 (intakes 2021+)

#### Material Alteration: Yes and is accompanied by the relevant course information sheets.

**Rationale:** There is currently no legal protection or role for an equine 'therapist' and as such consultation with the higher and further education teams, industry experts, existing and potential students have supported. The strategic direction for Equine coincides with a will to drive the industry forward in terms of standards and graduate destinations. The move away from the term 'therapy' towards rehabilitation and enables students to develop forward thinking, novel scientific approaches alongside a transferable skillset to enable them to stand out upon graduation.
